PART 1

What Liraasa is

liraasa is the ascended form of lira, song: “song of the first stars”. A goddess-centric language, built for singing.

1,462 headwords: 472 roots and 990 compounds.

The grammar in eight lines

1. Every vowel is its own syllable; stress falls on the second-to-last. Spelling is sound.
2. Every headword has **seven slots** by rule: a noun, its ascended and negative nouns, an adjective for each, and a verb.
3. A compound is two headwords written as one, **head last**: luno + lumi = lunolumi, moonlight.
4. Word order is **subject, verb, object**; tense and every operator stand before the verb.
5. **Adjectives come before the noun**, and a noun never modifies a noun: make the first an adjective.
6. Two copulas: ke for what is so now, ka for what is so by nature.
7. A question keeps statement order and ends in ki.
8. `-ri` makes a plural, `-ti` a little or dear thing. In X de Y, Y owns X, unless X is a pronoun or a name.

First words

yeko hello

zabo yes / affirmative

fisa please

lorejuba thank you (short, native)

voge goodbye / parting

kepi no

yade sorry / pardon

Lorejuba ala taivo. Thank you [heart-gift to you].

PART 2

Sound and singing

The spelling is phonetic: what you see is what you sing.

Aspect	Rule
Vowels	a e i o u (pure); adjacent vowels are separate syllables
Letters	l m n r s v y; b d p t g h z k c f j (sh, ch only in colour/number words)
Stress	penultimate syllable

Vowels are pure, as in Spanish or Italian. l m n s v b d p t f k sound as in English; y as in "yes"; r is a single tap, as in Spanish "pero"; g is always hard, as in "go"; h as in "hope"; z as in "zone". c is always "ch" as in "chant", before every vowel: ca = cha, co = cho, and likewise ce, ci, cu. j is the voiced partner of c, as in "jewel". sh is as in "shade"; ch, written only in a few colour and number words, is the same sound as c. `2.0:G43`

Adjacent vowels never merge. A consonant between vowels starts the next syllable; of two, the first closes the syllable before. Capitals mark the stress:

Word	Syllables and stress
lira	`LI-ra` /ˈli.ra/ 2 syl.
maivo	`ma-I-vo` /ma.ˈi.vo/ 3 syl.
opioa	`o-pi-O-a` /o.pi.ˈo.a/ 4 syl.
benaasa	`be-na-A-sa` /be.na.ˈa.sa/ 4 syl.
lunolumi	`lu-no-LU-mi` /lu.no.ˈlu.mi/ 4 syl.

Writing for song

- **Stress and the beat.** Every word falls from its stressed syllable to a light last one: set the stressed syllable on a strong beat and let the last fall on a weak one. The small words are short and unstressed; let them fill the weak beats.
- **Neighbouring vowels.** Every written vowel is its own syllable (0.8:R8), but in singing neighbouring vowels may glide into one note: benaasa may be sung be-na-a-sa or be-naa-sa. The spelling never changes; the songwriter chooses the count the melody needs. `2.0:G44` `0.8:R8`

- **Rhyme.** A rhyme runs from the stressed vowel to the end of the word: devi, nevi and jurevi rhyme on -evi. A compound ends in its head, so lira and daigolira share the whole rhyme: an identity rhyme, the same word sounding twice, and a family counts it once. Counted by the root each word ends in, across headwords, pronouns and small words, there are 36 rhyme families. Five of them:

- **-evi**: jurevi, devi, nevi
- **-era**: vera, mera
- **-ivo**: rivo, maivo, saivo, taivo
- **-igo**: daigo, ligo
- **-avu**: nuravu, navu

Every adjective ends in `-san`, so adjectives at the ends of lines rhyme in five sets, by the vowel before it: `-asan` 181 (lirasan, benasan) · `-esan` 111 (loresan, sovesan) · `-isan` 156 (vanisan, lumisan) · `-osan` 146 (lunosan, melosan) · `-usan` 145 (velusan, ramusan).

Licences of verse

- baba may be omitted only in verse. `0.8:R5`
- In verse, once the time has been set, the bare present may narrate past events. `1.2:G31`
- After a number or quantifier the plural `-ri` is optional: choose by sound and meter `1.2:G28`.

Sound follows meaning

For new and respelled roots: prefer CVCV; l m n r v for sacred/tender/lyrical; b d g k p t z h for bodily/everyday/harsh; playful b c p for beloved small creatures; related meanings may share a consonant frame; no suffix-look-alike endings (-ti -ri -na -vu -yo -asa); at least two letters from every root and small word except deliberate families. Not retroactive. `2.1:G57`

Names

A foreign name is not translated. It is copied as closely as Liraasa letters allow, choosing among near spellings by how the name sounds and sings. `2.0:G45` A name may take the affectionate `-ti` `0.8:R12`.

Peter becomes Peta; Pietri becomes Petri.

PART 3

Words

Seven forms by rule, and meanings that are often the word's own.

The seven forms

Every headword fills the same grid. Here it is for bena, good, with the rule for each cell:

	Noun	Adjective
Plain	bena `R` good, moral, helpful	benasan `R+san` good; moral
Ascended	benaasa `R+asa` the ultimate good, righteous; righteousness	benaasasan `R+asasan` supremely righteous
Negative	benana `R+na` wrong, immoral, bad, evil	benanasan `R+nasan` bad; unethical; wicked
Verb	benaba `VERB` to do good	

Ascended is the ultimate, cosmic degree, for good or ill: lumiasa Her Divine Light; narvoasa infernal darkness, demons, narvoasasan demonic, evil. **Negative** is the absence or the reversal.

Many cells are empty. 6,202 of the 10,234 forms have no meaning: the lexicon marks them unused, and this guide strikes them through. devi, goddess, has no verb: ~~devida~~ is an empty form, and an empty form is not a word.

Meanings are lexicalized. The ascended and negative meanings are fixed by the lexicon, not summed from the parts: daigo, death, has resurrection as its negative.

	Noun	Adjective
Plain	daigo death	daigosan dead; mortal
Ascended	daigoasa ultimate death, final death	daigoasasan the ultimate death, the final death

	Noun	Adjective
Negative	daigona resurrection	daigonasan death-ending, healing, life-giving; deathless; immortal
Verb	daigoda to die; to cease living (intransitive); to perish	

The verb rule

Root begins with	Verb	Example
opi	opioa	opi → opioa
n-initial	R+nia	nedu → nedunia
s-initial	R+sia	sabe → sabesia
vowel-initial	R+a	amor → amora
otherwise	R + first consonant + a	lira → lirala

A compound takes the verb class of its first letter. opi, hope, owns the one irregular verb.

Derivations

Order: **ROOT + (one form OR one derivation) + -ti + -ri**. Derivations attach to any root or compound, with these default readings; a listed meaning (Appendix B) overrides the default `2.0:G41` `1.0:G20`.

Suffix	Meaning	Default reading
`-ti`	diminutive	a little or dear R (also affectionate)
`-ri`	plural	
`-yo`	agent	one who does R; one devoted to R
`-vu`	augmentative	a big or intense R
`-pago`	place	the place of R

Compounds

- MODIFIER + HEAD, written as one word, head last; the spelling is the two joined. A compound is one word, never two nouns side by side.
- Either part may itself be a compound (2.0:G42): mavolumimiga = mavolumi soul (mind light) + miga relation, soulbond. A colour base may be the modifier, and a compound may be lexicalised with `-ti` (2.0:G38).
- Image compounds are a pattern, not a list: any listed modifier with any listed head (2.0:G40) (Part 8).

Motion prefixes

Written with a hyphen before the verb: revo-sabesia, recognize (1.2:G35). A closed list; only on motion verbs and the listed metaphors; not productive: `va-` toward the speaker · `du-` away; giving away · `taro-` across · `yave-` together, to meet (curated metaphor: yave-donuda) · `revo-` back, again (curated metaphors: revo-vimova, revo-lirala, revo-sabesia).

Registers

Entries are everyday or poetic. A headword whose root meaning is inherently sacred may be marked sacred after review; none has been yet (0.8:R10).

PART 4

The small words

Closed classes, each with its own pattern.

Pronouns

Form	Person	Number
maivo	First person	Singular
taivo	Second person	Singular
saivo	Third person	Singular human / person
maivori	First person	Plural
taivori	Second person	Plural
saivori	Third person	Plural people
ito	Third person	Singular inanimate
itori	Third person	Plural inanimate

Possessive: PRONOUN de X, maivo de lira, my song. Reflexive: PRONOUN sela, maivo sela, myself.

Correlatives: determiner + concept

	coda	pago	krono	nela	modo	kasa
ki	ki-coda what	ki-pago where	ki-krono when	ki-nela who	ki-modo how	ki-kasa why
eli	eli-coda this thing	eli-pago here	eli-krono now	eli-nela this person	eli-modo in this way	eli-kasa for this reason
ola	ola-coda that thing	ola-pago there	ola-krono then	ola-nela that person	ola-modo in that way	ola-kasa for that reason

	coda	pago	krono	nela	modo	kasa
toda	toda-coda everything	toda-pago everywhere	toda-krono always	toda-nela everyone	toda-modo in every way	toda-kasa for every reason
nuna	nuna-coda nothing	nuna-pago nowhere	nuna-krono never	nuna-nela no one	nuna-modo in no way	nuna-kasa for no reason
somi	somi-coda something	somi-pago somewhere	somi-krono sometime	somi-nela someone	somi-modo somehow	somi-kasa for some reason
muya			muya-krono often			
poka			poka-krono rarely			
rada			rada-krono each time			

Beside the grid: ki-eli which? + noun · ki-muya how many · ki-oro whether (or not).

Place, time, manner and cause (`-pago` , `-krono` , `-modo` , `-kasa`) work as adverbials; thing and person (`-coda` , `-nela`) as nouns. muya-krono often, poka-krono rarely, rada-krono each time 1.2:G34.

A number joined to krono counts the times: una-krono once, dossa-krono twice; ki-muya-krono how many times; una-ne krono the first time. una-krono never means “formerly”: that is somi-krono 2.1:G49.

A bare measure after the object is a duration; kroti + a measure, with no article, is “ago”; krotiapo + a measure is “in, after”. With li + a noun, kroti and krotiapo are “before” and “after” it 2.1:G55.

Numbers

0 zira · 1 una · 2 dossa · 3 tressa · 4 cuara · 5 penta · 6 sesa · 7 seta · 8 ocha · 9 niva

Ten is unzira; 11–19 add the unit with a hyphen: unzira-una, 11. Tens 20–50 contract (dozira, trezira, cuazira, penzira); from 60 they are the digit + zira: sesazira, nivazira. Hundreds are the digit + centa, and the rest joins with hyphens: dossacenta-unzira-penta, 215. centa is one hundred, mililumi a thousand. Ordinals take `-ne` (una-ne, first); fractions are N de N (tressa de cuara). A ne after a number is never negation.

Colours

Nine families, a base and four shades each. sh is written only in colour words (shada), and ch only in ocha, eight, and the numbers built on it. A colour base may lead a compound 2.0:G38; aurumijuba and vanajuba are also headwords 2.0:G39.

Family	Base	+narvo dark	+bio life	+juba gem	+lumi light
Red	rubi	rubinarvo	rubibio	rubijuba	rubilumi
Orange	ojo	ojonarvo	ojobio	ojojuba	ojolumi
Yellow	aurumi	auruminarvo	aurumibio	aurumijuba	aurumilumi
Blue	azuri	azurinarvo	azuribio	azurijuba	azurilumi
Green	verde	verdenarvo	verdebio	verdejuba	verdelumi
Violet	vio	vionarvo	viobio	viojuba	violumi
Black	shada	shadanarvo	shadabio	shadajuba	shadalumi
White	vana	vananarvo	vanabio	vanajuba	vanalumi
Brown	erta	ertanarvo	ertabio	ertajuba	ertalumi

Discourse particles

Particle	Function	Where	Example
hema	hesitation; holding the floor ("well…", "um")	clause-initial; between constituents; standalone	Hema… maivo ne sabesia. Well… I don't know.
nido	self-repair: cancels the speaker's own preceding word, phrase or clause and replaces it ("I mean", "rather", "no —")	immediately after the abandoned item and before its replacement; or clause-initial to reformulate a whole previous utterance	Maivo po bumreba tressa, nido, cuara bumreri. I baked three, I mean, four loaves.
yori	topic return / closure ("anyway", "at any rate"); with a possessive seno phrase, resumption ("as I was saying")	clause-initial; standalone	Yori. Li bumre keleka ki? Anyway. Is the bread rising?

Particle	Function	Where	Example
zoke	irony / sarcasm: the speaker does not endorse, or mocks, the proposition	clause-final, in the attitude slot (instead of seye/mufe/poye/pifu); may precede ki; standalone	Dorin milobema toda-krono, zoke. Dorin smiles all the time. (Sure he does.)

PART 5

The clause

A fixed order, anchored on the verb. Only the subject and the verb are required.

The core order

```
FRAME · SUBJECT · TENSE · ne · MODAL · VERB · OBJECT · ADJUNCTS · ATTITUDE · ki
```

Eli-krono, maivo lirala.
Now I sing.

Maivo po ne somusia.
I did not sleep.

Taivo futu relnura ki?
Will you come back?

Maivo lirala poye.
Perhaps I sing.

- Operators stand before the verb, in the order of the full table below. ne doli tu yesta pendi vinto stand immediately before the constituent they scope over (noun phrase, verb, adjective, number, clause-introducer such as si). Scope runs left over right `1.0:G1`: ne negates what follows it.
- One word per slot, at most 4 before the verb. These never share a clause `1.0:G16`: hiro + roni · hiro + tefa · teki + roni · teki + tefa · telvo + tefa · vazdi + tefa · fesmo + tefa · zoke + seye · zoke + mufe · zoke + poye · zoke + pifu · tavki + fututi · hoyo + yasmo.

> **! TAKE CARE**
>
> In X de Y, **Y owns X**: li bumre de li cilni, the bread of the city. **But a pronoun or a personal name on the left is the owner**: taivo de lira, your song; pilo de bumre, father's bread `1.2:G27`. A pronoun outranks a name: Pilo de maivo po lirala. My father sang `1.2:G32`.

Copulas

ke temporary is / are · ka enduring is / are · kapoki previously was · loya become · miyo existential there is / are

A predicate adjective may stand bare: lira benasan. Transitivity is usage-based: gome passivises any verb used with an object. Valency: CAUSER [TENSE…] vaku/lesvu/tekvu ACTOR [ne] VERB [OBJECT] 1.0:G14.

The noun phrase

```
[QUANTIFIER] [li|eli|ola|OWNER de] [NUMBER] [ADJECTIVES] NOUN[-ti][-ri] [de …] [raho CLAUSE]
```

Adjectives before the noun; a noun never modifies a noun 0.8:G7. toda N is every N; toda li N is all the N.

li may be omitted in everyday speech as well as verse when the referent is obvious; never when ambiguous. 0.8:R5

Partitive de. After a number, a quantifier or a superlative, de means of / among, and the ownership rules do not apply: Una de maivori futu relnura. One of us will return. Fractions are the same construction 2.1:G53.

Linking clauses

ata and · nara but / however · oro or · si if · sina unless · kasa because · kopisa so that / in order to · nevi although · fime complementizer: that · raho who / that / which (relative) · sidu infinitive / chaining · kube when (subordinate) · nayo while (subordinate time) · tuni until · sige since (time) · kureli as soon as

A clause with its own verb needs a linker. fime opens "that …" (the demonstrative is ola); raho opens a relative, closed by a comma unless it ends the sentence 1.0:G21; sidu joins two verbs sharing a subject and never takes a copula; ala is toward, **never** the infinitive "to".

> Maivo sabesia fime taivo lirala.
> I know that you sing.

> Li nela raho lirala ka benasan.
> The person who sings is good.

> Maivo desida sidu lirala.
> I want to sing.

> Maivo desida fime taivo lisrola.
> I want you to stay.

- sidu keeps one subject; a second verb with **its own subject** goes in a fime clause, which inherits the tense 2.1:G50 0.8:R6.
- A relative on a prepositional object: raho opens the clause and the preposition keeps its place, followed by a resumptive pronoun (ito/itori, saivo/saivori): Li nimu raho maivo po lirala en ito, ka vanisan. The

home in which I sang is beautiful. 2.1:G52

- **So … that**: ola-modo ADJ … fime CLAUSE: Taivo ke ola-modo vanisan fime li veluri lasola. You are so beautiful that the stars fall silent. 2.1:G54
- Evidentials: with none, the sentence makes no claim about its source. Inside fime, the evidential reports the main-clause subject's evidence; in a question it asks for the listener's source 2.1:G51.

Questions, exclamations, wishes

A question keeps statement order: **the question word stands where its answer would stand**, and **every direct question ends in ki**. A `ki-` word of time may open the clause as a frame. An embedded question keeps the word in place with no ki; an embedded yes/no question uses ki-oro 2.1:G46 0.8:G4 1.0:G2.

Taivo pagopa ki-pago ki?
Where are you going?

Ki-nela lirala ki?
Who sings?

Taivo amora ki-eli lira ki?
Which song do you love?

Maivo ne sabesia ki-pago taivo futu pagopa.
I don't know where you will go.

- **Exclamations.** A main clause with a `ki-` word and no final ki is an exclamation: ki-modo ADJ, how …!; ki-eli N, what a …!; ki-muya N, so many …! Li nullo ka ki-modo vanisan! How beautiful the night is! 2.1:G47
- **Blessings and wishes.** pifu with any subject is the blessing form: Li lumi tivrota taivo pifu. May the Light hold you. With noma, it is "if only": Taivo po noma lisrola pifu. If only you had stayed. 2.1:G48
- **Prohibitions.** ne + a command, with no subject; fisa softens it; yava ne + verb is "let us not": Ne senobakosia maivo! Don't interrupt me! 2.1:G56

PART 7

Nemelira de devi: The Goddess's Lament

A whole song, one line at a time: the Liraasa, a gloss under each word, the English, and the grammar the line shows. The song is in 2.1 spelling: the author carried it over when 2.1 respelled three of its words (harmadesi, solanevra, ramuduha) 2.1:G58. Glosses are read from the lexicon; a changed form is glossed by its root and a label (navuasa, sky-ASC). Labels: PST past, FUT future, NEG negation or negative form, Q question, PL plural, DIM diminutive, ASC ascended form, 1SG / 2SG I / you, COP.NOW ke (so now), COP.NAT ka (so by nature), DREAM.EVID vuda (seen in a dream).

---

1 Maivo de amor, taivo po nevrania da li navuasa ala li teru gase baba velusolo.
1SG of love 2SG PST descend from the sky-ASC to the earth as a meteorite

My love, you descended from the firmament to the earth like a falling star-stone.

A pronoun before de owns what follows: maivo de amor, my love 1.2:G27; the commas set it off as address 1.2:G31. navuasa is the ascended form of navu, sky: the sky at its ultimate, the firmament. gase baba + noun is a simile, "like a …".

2 Taivo po yugeya baba daigosan yuge, ata li veluri po lasola.
2SG PST embody a dead body and the star-PL PST hush

You took on a mortal body, and the stars fell silent.

One root, two jobs: yugeya is the verb of yuge, body (consonant-initial, so R + its first consonant + a), and yuge is its object. The adjective comes first: daigosan yuge, a mortal body.

3 Eli-krono taivo ke lemvosan en li cilniri de li nelari.
now 2SG COP.NOW tired in the city-PL of the person-PL

Now you are weary in the cities of humankind.

A time word opens the clause and needs no comma 1.2:G24. ke is the copula of a passing state; `-ri` makes the plural: cilniri, nelari.

4 Taivo de mavolumi ka velusan, nara taivo de yuge ke vulrasan.
2SG of soul COP.NAT starlit but 2SG of body COP.NOW wounded

Your soul is starlit by nature, but your body is wounded for now.

The line turns on the two copulas: ka for what is so by nature (the soul is starlit), ke for what is so for now (the body is wounded).

5 Maivo vuda vimova taivo de timruri raho ralnora gase renli.
1SG DREAM.EVID see 2SG of tear-PL who fall as rain

In dreams I see your tears, which fall like rain.

vuda (DREAM.EVID) is the evidential of dream, set right before the verb: the speaker sees this only in a dream. raho opens a relative clause; it ends the sentence, so no comma closes it 1.0:G21.

6 Li harmadesi tivrota taivo, ata li kronorivla ne teklata.
the temptation hold 2SG and the flow of time NEG stop

Temptation holds you, and the flow of time does not stop.

ne stands right before what it negates. kronorivla is time + flow: the flow of time.

7 Taivo lemula li lorenuravu de li nelari ata li vemineme.
2SG learn the anguish of the person-PL and the world-weariness

You learn the anguish of humankind and the sorrow of the world.

ata joins two noun phrases as well as two clauses. Both nouns are compounds: heart + anguish, world + sorrow.

8 Taivo de manliri yanbaya, ata taivo de lore ke lemvosan.
2SG of hand-PL age and 2SG of heart COP.NOW tired

Your hands grow old, and your heart is weary.

No tense word means the present: the hands are aging now. Each half has its own subject and verb, so ata links them.

9 Maivo lavbula vobi taivo hupi li solanevra, nara maivo de valla ke lasosan.
1SG pray for 2SG above the sunset but 1SG of voice COP.NOW silent

I pray for you above the sunset, but my voice is silent.

vobi (for) and hupi (above) are prepositions after the verb. solanevra is sun + descent: a compound is two headwords written as one word, the head last.

10 Kasa maivo ka devi, maivo ne povi venreva ala taivo.
because 1SG COP.NAT goddess 1SG NEG can come to 2SG

Because I am a goddess, I cannot come to you.

kasa opens a clause of cause. ne before the modal povi negates the ability: scope runs left over right 1.0:G1.

11 Li daigo ka baba dorbi, ata maivo sulnosia taivo en li lumiasa.
the death COP.NAT a door and 1SG wait 2SG in the light-ASC

Death is a door, and I wait for you in the Divine Light.

ka again, for what death is. sulnosia shows the s-initial verb, R + -sia. lumiasa, the ascended form of lumi, light, is Her Divine Light: the Goddess's own light, not the Goddess herself, who is deviasa.

12 Maivo de lunosavali loki ke su taivo de rezari.
1SG of moonlit kiss still COP.NOW on 2SG of lip-PL

My moonlit kiss still rests upon your lips.

lunosavali, moon + kiss, is an image compound: any listed modifier and head make a word with a predictable reading 2.0:G40. loki, still, stands before the verb, here the copula ke.

13 Li velumelo loki lirala taivo de nole ultra li navu.
the music of the spheres still sing 2SG of name beyond the sky

The music of the spheres still sings your name beyond the sky.

lirala shows the consonant-initial verb: lira + l + a. velumelo, stars + music, is the music of the spheres.

14 Maivo de ramuduha ka gase dendusan gase li vamrisevu.
1SG of longing for what is gone COP.NAT as deep as the sea of space

My longing for what is gone is as deep as the dark between the stars.

gase A gase B is "as A as B": as deep as the dark between the stars.

15 Taivo kersoka en li narvo gase baba nolsakerso su li lamsa.
2SG grow in the darkness as a new growth on the ash

You grow in the darkness like new shoots upon the ashes.

kersoka, to grow, and nolsakerso, new growth, are the same root kerso as verb and as the head of a compound.

16 Kube taivo relnura, maivo futu lomola taivo, ata li lektaasa futu venreva.
when 2SG return 1SG FUT embrace 2SG and the gathering-ASC FUT come

When you return, I will embrace you, and the great reunion of all souls will come.

kube opens a clause of time, and the comma closes it. futu marks the future twice. lektaasa, the ascended form of gathering, is the great reunion of all souls.

The compounds of the song

- velusolo = velu star + solo stone: meteorite; a fallen star-stone
- mavolumi = mavo mind + lumi light: soul (mind light)
- harmadesi = harma sin + desi want: temptation
- kronorivla = krono time + rivla flow: the flow of time
- lorenuravu = lore heart + nuravu ache: anguish; heartache
- vemineme = vemi world + neme sorrow: world-weariness; sorrow at the state of the world
- solanevra = sola sun + nevra descent: sunset
- lunosavali = luno moon + savali kiss: moonlit kiss; an intimate kiss recalling moonlight
- velumelo = velu star + melo music: the music of the spheres
- ramuduha = ramu memory + duha longing: longing for what is gone
- vamrisevu = vamri space + sevu sea: the sea of space; the dark between the stars
- nolsakerso = nolsa newness + kerso growth: new growth; sprouts; regrowth

D. Editions and rulings

Liraasa 1.0 (1,099 headwords) is the frozen base. 1.1 added vocabulary (1,418); 1.2 added rulings 1.2:G24–G36 and words (1,497). 2.0 added 356 headwords and moved 391 pattern-built compounds out of the dictionary into the image-compound pattern, hence 1,497 − 391 + 356 = 1,462. The 391 keep their glosses as attested image compounds and are **not** counted in the 1,462.

2.1 added rulings 2.1:G46–G59 and respelled 30 roots, 2 of them replaced by compounds, with every form, compound, image compound and derivation built on them; the headword count stays 1,462. A respelled root keeps every meaning and empty slot; all forms, derivations, compounds and image compounds respell with it; compound verbs follow the new first letter; 2.0 spellings retired, 2.0 texts read under 2.0 spellings; overrides protected for these 30 roots; new spellings protected. `2.1:G58` volda -> larbopagobudi (larbopago + budi); taha -> kezupago (kezu + pago). Compound reading of kezupago is canon. `2.1:G59`
