Liraasa: The Grammar in Lessons

Edition 3.1 · 23 short lessons, about ten minutes each; the last part is proposed

Liraasa is a language built for singing: every vowel rings, every word ends open, and the grammar keeps a fixed, calm order so the words can be sung without tripping.

These lessons take you through the whole grammar, one small idea at a time. Each takes about ten minutes. Read the idea, say the examples aloud, then try the practice lines before you open the answers. Each lesson uses only what came before it.

Every Liraasa sentence here has been checked against the 3.1 grammar, so you can trust it as a model. The last part, on devotion, music and measure, teaches the 3.0 rulings, which are **proposed**: the author has not yet ratified them. The rule numbers at the foot of each lesson (2.5:G88, 3.0:G129 and so on) point into the Reference Grammar.

PART 1

Sounds and words

1 How Liraasa sounds

Before any grammar, the music. Liraasa is spelled exactly as it sounds, so once you know the letters you can read anything aloud.

- Five vowels, a e i o u, each always the same. **Every vowel is its own syllable**: maivo is ma-i-vo, three syllables.
- The stress falls on the **second-to-last syllable**: li-RA-la, ma-I-vo.
- Words end in a vowel, which is what makes them easy to sing. **c** is always the sound in *church*, **j** its voiced partner, **r** a light tap, **g** always hard.
- A spelling never changes. What you see is what you sing.

> Maivo lirala.
> I sing.
>
> Taivo lirala.
> You sing.

TRY IT

▼ Say aloud, with the stress in the right place: “I sing.”

Maivo lirala.

Rules: 2.0:G43 · 2.0:G44

2 One root, seven forms

Here is the engine of the vocabulary. Learn one root and you can often reach a whole family of words.

- Every headword is a **root**, and the root itself is the noun: lira, song.
- Endings make its other forms. The verb: lirala, to sing. The adjective adds **-san**: vanisan, beautiful (from vani, beauty).
- The verb ending follows the root's first letter: most roots add their first consonant + **a** (lira → lirala); roots in s- add **-sia** (sabe → sabesia), in n- add **-nia**, and roots starting with a vowel add **-a** (amor → amora).
- Two more pairs give the *ascended* (exalted) forms, **-asa** and **-asasan**, and the *negative* forms, **-na** and **-nasan** (the absence or opposite).
- **Only the forms the dictionary lists exist.** A form it does not list has no meaning, so look a word up before you build it.

> Maivo amora taivo.
> I love you.
>
> Taivo sabesia maivo.
> You know me.

TRY IT

▼ "You love me."

Taivo amora maivo.

Rules: 0.8:R2

3 Building more words

A few small endings and the art of putting two words together will multiply what you can say.

- **-ri** makes a plural: lirari, songs. **-ti** makes a little or dear one: lirati, a little song. Both together: liratiri, little songs.
- Three endings make new nouns from any root: **-yo** one who does it (lirayo, singer), **-vu** a big or intense one (liravu, a grand song), **-pago** its place (lemupago, school).
- **Compounds** join two headwords, the describing one first: lunolumi, moonlight (moon + light).
- **A noun never describes a noun directly.** To say *songbird*, make the first noun its adjective: lirasan lavra.
- **Image compounds** join a listed modifier and head into one word, like lunosavali, a moonlit kiss, and they have all seven forms. Prefer the ones the dictionary already lists.

> Maivo amora lirari.
> I love songs.
>
> Li lavra lirala.
> The bird sings.

WATCH OUT ~~benasanri~~ An adjective takes -ri only when it stands as a noun after an article (li benasanri, the good ones).

TRY IT

▼ “The bird sings songs.”

Li lavra lirala lirari.

Rules: 2.0:G41 · 2.5:G122 · 2.5:G124 · ADR-0011

PART 2

The simple sentence

4 Who does what

Liraasa word order is English word order: who, then what they do, then to what. You can already make real sentences.

- The order is fixed: **SUBJECT, VERB, OBJECT**. The position tells you who does what; nothing else does.
- The pronouns: maivo I, taivo you, saivo he or she, ito it, and with **-ri** the plurals maivori we, taivori you all, saivori they, itori they (things). An animal is ito; a named animal is saivo.
- li is *the*, baba is *a*. Names stay as they are: Kipo, Dorin.
- maivo is also the noun *Self*; when you mean the Self, write li maivo.

> Maivo lirala baba lira.
> I sing a song.
>
> Li lavra lirala; ito amora li nimu.
> The bird sings; it loves the home.
>
> Kipo amora Dorin.
> Kipo loves Dorin.

TRY IT

▼ “You sing a song.”

Taivo lirala baba lira.

▼ “We love the song.”

Maivori amora li lira.

Rules: 2.5:G128 · 2.5:G100 · 2.5:G102

5 Describing things

Adjectives come before the noun, just as in English, and a few small words point at things.

- The adjective goes **before** its noun: baba vanisan lira, a beautiful song.
- A degree word goes right before its adjective: ruli vanisan, very beautiful.
- eli this, ola that, eliri these, olari those. eli and ola take a singular noun; with the plural pair, **-ri** on the noun is optional.
- An adjective can stand as a noun, but only after an article: li benasanri, the good ones.

> Maivo lirala baba ruli vanisan lira.
> I sing a very beautiful song.
>
> Maivo amora eliri lirari.
> I love these songs.

WATCH OUT ~~eli lirari~~ eli is singular: these songs is eliri lirari.

TRY IT

▼ “I love this song.”

Maivo amora eli lira.

▼ “these songs”

eliri lirari

Rules: 2.5:G98 · 2.5:G101 · 1.2:G29

6 Two ways to say “is”

English has one is; Liraasa has two, and choosing between them says something lovely about time.

- ke is for what holds **now, or for a time**: a place, a mood, a passing state.
- ka is for what is **lasting, defining, by nature**: who someone is, what a thing is like.
- Both work with an adjective, a noun phrase or a place: Li kavbikova ke su li tabu. The basket is on the table (right now).
- In the present, with nothing else, an adjective may stand bare: Nela vanisan. The person is beautiful. Anything more needs ke or ka.
- loya is *become*; miyo is *there is*.

> Li kavbikova ke su li tabu.
> The basket is on the table (right now).
>
> Maivo ka lirayo.
> I am a singer (it’s who I am).
>
> Li nela ke benasan.
> The person is good at the moment.
>
> Li sora ka benasan.
> The friend is good by nature.
>
> Miyo baba sora en li nimu.
> There is a friend in the home.

TRY IT

▼ “The friend is in the home.” (right now)

Li sora ke en li nimu.

▼ “You are a singer.” (it’s who you are)

Taivo ka lirayo.

Rules: 2.5:G93 · 2.5:G128

7 Past, future, and “not”

Verbs never change their ending for time. Small words before the verb do that work, which keeps every verb easy to sing.

- po before the verb makes the past, futu the future. With neither, it is now.
- ne before the verb makes it *not*. It comes after the tense: po ne.
- With a copula: po ke, was (at that time); po ka, was (no claim about now); kapoki, was, and no longer is.

> Maivo po lirala.
> I sang.
>
> Maivo po ne somusia.
> I did not sleep.
>
> Taivo futu relnura.
> You will come back.
>
> Li nela po ke vanisan.
> The person was beautiful.
>
> Saivo kapoki benasan.
> They were good, and no longer are.

WATCH OUT ~~Li nela po vanisan.~~ An adjective standing bare takes no tense: with po, use ke or ka.

TRY IT

▼ “You sang a song.”

Taivo po lirala baba lira.

▼ “We will not sleep.”

Maivori futu ne somusia.

Rules: 2.5:G94 · 2.5:G128 · 1.0:G1

8 The little words before the verb

Here is where Liraasa gets expressive: a row of small words before the verb, always in the same order, each adding a shade of meaning.

- **Can, might, must**: povi can, nosi might, dagi may (allowed), musi must, suvi should, viki would, kopi hope to.
- **How it unfolds**: roni in progress, tefa completed, sahi habitually; hiro begin, teki stop; telvo try, vazdi manage, fesmo try and fail; tavki almost.
- **Again and still**: reve again, loki still, bodu already.
- They line up in this order: **tense, noma, ne, modal, almost, begin/stop, try, aspect, again, evidence**. Rarely more than two or three at once.
- ne negates what follows it: ne povi lirala, cannot sing; povi ne lirala, can not-sing.

> Saivo povi lirala.
> She can sing.
>
> Maivo po hiro lirala.
> I began to sing.
>
> Maivo loki lirala.
> I still sing.

TRY IT

▼ “You might sing.”

Taivo nosi lirala.

▼ “I almost sang.”

Maivo po tavki lirala.

Rules: 1.0:G1 · 1.0:G16 · 1.0:G3

PART 3

Noun phrases

9 Counting

Numbers are regular and easy to build, and a few small words handle some, many and about.

- una 1, dossa 2, tressa 3, cuara 4, penta 5. The number comes before the noun, and **-ri** after it is optional: dossa cono, two coins.
- **-ne** makes an order: una-ne, first. **antizi** makes a minus: antizi dossa, minus two.
- A fraction is NUMBER de NUMBER, with spaces: tressa de cuara, three quarters. For *one of the two*, add the article: una de li dossa.
- toda all, somi some, nuna none, muya many, poka few, rada each. gase before a number is *about*.

> Taivo guraga maivo dossa cono.
> You owe me two coins.
>
> Una de li dossa futu relnura.
> One of the two will return.
>
> Maivo tovota gase dossa cono.
> I have about two coins.

TRY IT

▼ “three quarters”

tressa de cuara

▼ “minus two”

antizi dossa

Rules: 2.5:G97 · 2.5:G101 · 2.5:G125 · 2.5:G107

10 “Of” and whose

One little word, de, carries of, possession and about. Two simple rules tell you who owns what.

- X de Y is **X of Y**: the noun after de owns. li bumre de li cilni, the bread of the city; li bumre de pilo, father’s bread.
- But a **pronoun** (or a personal name) before de is the owner: maivo de lira, my song; taivo de lira, your song.
- *Father*, *mother* and other family words are nouns, not names, so they follow the first rule.
- *About* is de too: li lira de amor, the song of (about) love.
- Chains read from the left; to say *the warmth of my body*, rephrase rather than stack three des.

> Taivo de lira ka vanisan.
> Your song is beautiful.
>
> li bumre de pilo
> father’s bread
>
> Li lira de li lavra ka vanisan.
> The song of the bird is beautiful.

TRY IT

▼ “my song”

maivo de lira

▼ “The song of the city is beautiful.”

Li lira de li cilni ka vanisan.

Rules: 2.5:G95 · 2.5:G96 · 1.2:G30

11 In, on, with: where and how

Prepositions come before their noun, as in English. The only real choice is which with you mean.

- en in, su on, ala to, da from, ligo near, hupi above, tula below, vobi for.
- **Three withs**: ko is company, or a feeling that goes with the act; yuta is a tool or something used up; en is a medium you are in, like a voice.
- The *side nouns* (nazru behind, zavme in front of, silda beside) work as prepositions, and keep their li: nazru li nimu.
- A time noun as *when* takes en: en merno, in the morning. A bare noun after a verb is its object.

> Maivo lallela li dorbi yuta li kemye.
> I open the door with the key.
>
> Maivo lirala ko amor.
> I sing with love.
>
> Saivo po senosia en baba melosan valla.
> She spoke in a musical voice.
>
> Li lavra semnesia nazru li nimu.
> The bird sits behind the home.
>
> Maivo vimova en merno.
> I see in the morning.

WATCH OUT ~~Li lavra semnesia nazru nimu.~~ A side noun keeps its li.

TRY IT

▼ “I sing with you.”

Maivo lirala ko taivo.

▼ “I sing in the morning.”

Maivo lirala en merno.

Rules: 2.5:G104 · 2.5:G99 · 2.5:G103

PART 4

Shaping the sentence

12 How, and how much

Liraasa has no adverb ending. Instead, one small word turns any adjective into how something is done.

- la + adjective is an adverb: la molusan, gently. It goes **after the verb and object**.
- A degree word sits between them: la ruli molusan, very gently.
- **More and less**: kasi more, menu less, mosa most, lusu least, and tamo than: kasi vanisan tamo, more beautiful than.
- For amounts: kasi lirari tamo taivo, more songs than you. For manner: la kasi molusan tamo taivo.
- gase … gase is *as … as*; gase + a noun is *like*: gase li lavra, like the bird.

> Maivo lirala la ruli molusan.
> I sing very gently.
>
> Li lira ka kasi vanisan tamo li seno.
> The song is more beautiful than the speech.
>
> Maivo tovota kasi lirari tamo taivo.
> I have more songs than you.
>
> Maivo lirala la kasi molusan tamo taivo.
> I sing more gently than you.

WATCH OUT ~~Maivo la molusan lirala.~~ la + adjective comes after the verb.

TRY IT

▼ “I sing gently.”

Maivo lirala la molusan.

▼ “You sing like the bird.”

Taivo lirala gase li lavra.

Rules: 2.5:G105 · 2.5:G106 · 2.5:G107

13 Asking

Questions are wonderfully simple: say the statement, then end with ki.

- A **yes/no question** keeps statement order and ends in ki: Taivo lirala ki?
- The question words: ki-coda what, ki-nela who, ki-pago where, ki-krono when, ki-kasa why, ki-modo how, ki-eli which, ki-muya how many.
- Put the question word where the answer would go, and end in ki: Taivo pagopa ki-pago ki?
- Or put it **first**, and the final ki becomes optional: Ki-kasa taivo po amora maivo? (ki-eli and ki-muya with a noun always keep ki.)
- Even a one-word question ends in ki: Ata ki? And?
- Without ki, Ki-eli nullo! is an exclamation: What a night!

> Taivo lirala ki?
> Do you sing?
>
> Taivo pagopa ki-pago ki?
> Where are you going?
>
> Ki-kasa taivo po amora maivo?
> Why did you love me?
>
> Taivo amora ki-eli lira ki?
> Which song do you love?
>
> Ki-eli nullo!
> What a night!

WATCH OUT ~~Taivo pagopa ki-pago?~~ A question word left in place needs the final ki.

TRY IT

▼ “Do you love me?”

Taivo amora maivo ki?

▼ “Who sings?”

Ki-nela lirala ki?

Rules: 2.5:G88 · 2.5:G91 · 2.5:G92 · 2.3:G76 · 2.2:G61

14 Asking someone to act, and wishing

Commands, let's, blessings and the little words of feeling at the end of a sentence.

- A **command** has no subject and is marked: it ends in ! or carries fisa, please: Lirala! Sing! Fisa, lisrola. Please stay.
- Ne + a command forbids: Ne lirala! Don't sing!
- Yava is *let us*: Yava lirala!
- Words of attitude close the sentence: seye certainly, mufe probably, poye perhaps, pifu may it be (a wish or a blessing).
- A final ki or attitude word always belongs to the main clause and comes last.

> Fisa, lisrola.
> Please stay.
>
> Ne lirala!
> Don't sing!
>
> Yava lirala!
> Let us sing!
>
> Maivo lirala poye.
> Perhaps I sing.
>
> Li lumi tivrota taivo pifu.
> May the Light hold you.

TRY IT

▼ "Sing!"

Lirala!

▼ "Let us sing!"

Yava lirala!

Rules: 2.5:G90 · 2.5:G89 · 2.1:G48 · 2.1:G56

15 Opening and closing a sentence

Around the core of every sentence there is room at the edges: a scene-setter at the front, a name at the end.

- **Up front**, set off by a comma, you may set the scene with a time or a place: Deyaapo, maivo po lirala. Eli-pago, maivo lirala.
- Before that, a line may begin with ata, oro or nara, carrying on from the line before.
- A **topic** comes first with hozi: *as for* …. If the topic is the subject, pick it up with a pronoun: Kipo hozi, saivo lirala.
- **At the end** the sentence closes in a set order: adjuncts (time words included), then fuyi (each other), then the attitude word, then ki.
- A person you speak to comes last, after a comma: …, maivo de amor?

> Deyaapo, maivo po lirala.
> Yesterday, I sang.
>
> Kipo hozi, saivo lirala.
> As for Kipo, they sing.
>
> Maivori lirala toda-krono fuyi pifu.
> May we always sing to each other.
>
> Taivo viki pagopa ligo maivo ki, maivo de amor?
> Would you come near me, my love?

WATCH OUT ~~Maivori lirala fuyi toda-krono pifu.~~ A closing time word comes before fuyi.

WATCH OUT ~~Kipo hozi, lirala.~~ A topic that is the subject is picked up by a pronoun.

TRY IT

▼ “Here, I sing.”

Eli-pago, maivo lirala.

▼ “I sing today.”

Maivo lirala deyapressa.

Rules: 2.5:G126 · 2.5:G127 · 2.5:G119 · 2.3:G72

PART 5

Joining clauses

16 “That”, “whether”, and questions inside sentences

Now one sentence can hold another. A single word opens the inner clause.

- fime is *that*: Maivo sabesia fime taivo lirala. I know that you sing.
- ki-oro is *whether*: Maivo po masuma ki-oro taivo relnura.
- An inner question keeps its question word and **never** takes ki: Maivo ne sabesia ki-pago taivo futu pagopa.
- The inner clause borrows the main clause’s tense unless it says its own; a sige (*since*) clause always says its own.
- ata and, nara but, oro or join clauses of equal rank.

> Maivo sabesia fime taivo lirala.
> I know that you sing.
>
> Maivo po masuma ki-oro taivo relnura.
> I asked whether you returned.
>
> Maivo ne sabesia ki-pago taivo futu pagopa.
> I don’t know where you will go.

TRY IT

▼ “I know that you love me.”

Maivo sabesia fime taivo amora maivo.

▼ “Do you know that I sing?”

Taivo sabesia fime maivo lirala ki?

Rules: 2.3:G77 · 2.5:G118 · 2.5:G89

17 Who, which, where

Relative clauses let you describe a noun with a whole sentence. One word, raho*, does it all.*

- raho + a clause describes the noun before it, with a gap where the noun would be: li nela raho lirala, the person who sings.
- If the clause has its own object or extra words and the sentence goes on, **close it with a comma**.
- For a place, a time, a preposition or an owner, keep a small pronoun in the clause: li pago raho maivo po venreva da ito, the place I came from; li lirayo raho maivo amora saivo de lira, the singer whose song I love.
- With no noun before it, raho is *the one who, what*: Maivo lirala raho taivo amora. I sing what you love.

> Li nela raho lirala ka benasan.
> The person who sings is good.
>
> Li sabeyo raho vismava eli, ne yehu vimova li vordu.
> The sage who studies this did not witness the word.
>
> li pago raho maivo po venreva da ito
> the place I came from
>
> Maivo lirala raho taivo amora.
> I sing what you love.

WATCH OUT ~~Li sabeyo raho vismava eli ne yehu vimova li vordu.~~ A raho clause with its own object closes with a comma when the sentence goes on.

TRY IT

▼ “the time when I sang”

li krono raho maivo po lirala en ito

Rules: 2.5:G115 · 2.5:G120 · 2.1:G52 · 2.2:G64

18 To, so that, and wanting

Three small linkers cover all the ways English uses to.

- sidu chains two verbs with one subject: Maivo desida sidu lirala. I want to sing.
- With a different subject, use fime: Maivo desida fime taivo lisrola. I want you to stay.
- **Purpose** is always kopisa: … kopisa lirala, to sing; kopisa taivo rilura, so that you dance. Add nosi for *so that perhaps*.
- An adjective + sidu + verb: the thing described is what the verb acts on: Trana ke ruli levasan sidu zeldoza. Change is very easy to resist.

> Maivo desida sidu lirala.
> I want to sing.
>
> Maivo po venreva eli-pago kopisa lirala.
> I came here to sing.
>
> Maivo lirala, kopisa taivo nosi rilura.
> I sing, so that perhaps you'll dance.
>
> Trana ke ruli levasan sidu zeldoza.
> Change is very easy to resist.

WATCH OUT ~~Maivo po venreva eli-pago sidu lirala.~~ sidu is for verb chains; purpose is kopisa.

TRY IT

▼ "I want you to stay."

Maivo desida fime taivo lisrola.

▼ "I sing so that you dance."

Maivo lirala kopisa taivo rilura.

Rules: 2.5:G113 · 2.5:G116 · 2.5:G111 · 2.1:G50

19 If, because, therefore

Reasons, conditions and what never happened: the logic of a story.

- si if, sina unless, kasa because, nevi although, kube when, nayo while, tuni until, kureli as soon as.
- A clause that comes first is followed by a comma: Si taivo lirala, maivo futu rilura.
- noma marks what is contrary to fact. *Would have* is always po noma viki: taivo po noma viki relsira.
- Tonsi, with a comma, opens a clause: *therefore*. Before an adjective after ke or ka, tonsi is *so*: ke tonsi corvisan fime …, so brave that ….

> Si maivo po noma masuma, taivo po noma viki relsira.
> If I had asked, you would have answered.
>
> Kureli taivo venreva, maivo po lirala.
> As soon as you came, I sang.
>
> Tonsi, maivo lirala.
> Therefore, I sing.

WATCH OUT ~~Taivo po viki relsira.~~ “Would have” needs noma: po noma viki.

TRY IT

▼ “If you sing, I will dance.”

Si taivo lirala, maivo futu rilura.

▼ “I sing because you dance.”

Maivo lirala kasa taivo rilura.

Rules: 2.5:G114 · 2.5:G117 · 2.5:G118 · 1.0:G6

20 Being acted on, and making others act

The last tools: turning a sentence around, giving to someone, and making someone do something.

- gome + verb makes a passive, gagu the doer: Li lira gome sarbisia gagu maivo. The song is written by me.
- vaku make, lesvu let, tekvu prevent, then the one who acts, then their verb: Taivo vaku maivo lirala. You make me sing.
- **Giving**: the thing given first, then ala + the receiver: donuda li bumre ala pilo. A pronoun receiver may stand bare right after the verb: Taivo guraga maivo dossa cono.
- **Motion prefixes** add direction to any verb: va- toward me, du- away, taro- across, yave- together, revo- back or again: revo-lirala, sing again.

> Li lira gome sarbisia gagu maivo.
> The song is written by me.
>
> Maivo vaku saivo sapusia li nami.
> I make him eat the food.
>
> Maivo po donuda li bumre ala pilo.
> I gave the bread to father.
>
> Maivo revo-sabesia taivo.
> I recognize you.

TRY IT

▼ “You make me sing.”

Taivo vaku maivo lirala.

▼ “I gave the bread to my father.”

Maivo po donuda li bumre ala maivo de pilo.

Rules: 2.5:G110 · 2.5:G109 · 2.5:G112 · 2.5:G121

PART 6

Devotion, music and measure (proposed in 3.0)

21 Calling on someone: iya, names and titles

In prayer and in song you often speak to someone. Liraasa marks the call with one small word, and lets names gather into a litany.

- iya + a name or noun phrase is *O …*: a call to someone. It opens the sentence, set off by a comma, or closes it after one: Iya Deviasa, lenila maivo! O Great Goddess, hear me!
- iya belongs to its noun phrase, so no comma follows it. It may also stand alone, as an invocation: Iya Lumimare!
- A second noun phrase set off by commas **renames** the first: an *apposition*. It keeps its own li and takes no ke. Several in a row make a **litany**.
- A title of the Goddess used as a **name** is capitalised and takes no li: Deviasa, Lumimare. As a name it owns before de, like any name: Deviasa de lira, the Great Goddess's song. A description keeps li and stays lower-case: li mareasa de li lumi, the mother of light.
- Taivo and Saivo may be capitalised when they mean the Goddess. That is a habit of devotional writing, and changes nothing in the grammar.

> Iya Deviasa, lenila maivo!
> O Great Goddess, hear me!
>
> Iya Lumimare!
> O Mother of Light!
>
> Deviasa, li mare de li veluri, lirala.
> The Great Goddess, the mother of the stars, sings.
>
> Iya Deviasa, Velumare, Lumimare, Liramare!
> O Great Goddess, Mother of the Stars, Mother of Light, Mother of Song!
>
> Lumimare lirala.
> The Mother of Light sings.
>
> Taivo viki pagopa ligo maivo ki, iya maivo de amor?
> Would you come near me, O my love?

WATCH OUT ~~Iya, Deviasa, lenila maivo!~~ iya belongs to its noun phrase: no comma after it.

WATCH OUT ~~Deviasa li mare de li veluri lirala.~~ An apposition is set off by commas.

TRY IT

▼ “O Mother of Light!”

Iya Lumimare!

▼ “O mother of light, I sing for you.”

Iya li mare de li lumi, maivo lirala vobi taivo.

Rules: 3.0:G129 · 3.0:G130 · 3.0:G131 · 3.0:G138

22 Being, letting be, and asking

Three small turns let Liraasa say She is, Let there be light, and please to the divine.

- miyo after a subject, with nothing after it, says that the subject **exists**: Saivo miyo. She is. It takes a tense like any verb: Saivo po miyo. She was.
- ke and ka still always need something after them. For bare being, use miyo.
- miyo + a noun phrase with ! is a **fiat**, *let there be*: Miyo lumi! With pifu it is a wish: *may there be*. Without either it stays a plain statement: Miyo lumi. There is light.
- Two set formulas: Ola-modo po miyo, ola-modo miyo, ola-modo futu miyo. So it was, so it is, so it shall be. And Ola-modo pifu. So be it: amen.
- sela after the subject is emphatic, *herself*: Saivo sela po lirala. After the verb it is still the reflexive, *herself* as the object. sela never stands alone as the subject.
- A **petition** is a command opened by a call, softened with fisa. A command may carry ne, reve or loki, but never a tense, a modal or an evidential.

> Saivo miyo.
> She is. (She exists.)
>
> Saivo po miyo, saivo miyo, saivo futu miyo.
> She was, she is, she will be.
>
> Miyo lumi!
> Let there be light!
>
> Miyo sove en li nimu pifu.
> May there be peace in the home.
>
> Ola-modo pifu.
> So be it. (Amen.)
>
> Saivo sela po lirala.
> She herself sang.
>
> Iya Deviasa, fisa, ne pagopa vofa maivo!
> O Great Goddess, please, do not go far from me!
>
> Reve lirala!
> Sing again!

WATCH OUT ~~Saivo po ke.~~ A copula needs something after it: for bare being, Saivo po miyo.

WATCH OUT ~~Sela po lirala.~~ sela needs a pronoun or noun phrase before it.

WATCH OUT ~~Po lirala!~~ A command carries no tense.

TRY IT

▼ “I am.”

Maivo miyo.

▼ “Let there be light!”

Miyo lumi!

▼ “Sing again!”

Reve lirala!

23 Music, makers and measure

A singing language can now name a note, a beat and a cadence, say who made a song, and count things one by one.

- Words of music: lirvi a note, dobo a beat, monve a drone, melopuku a cadence, sonbunulu a scale, sonbulekta a chord, vinye a lute. Of measure: lenda a line, gaki an angle, pidi a tip, tiku precision.
- gagu after a made work names its **maker**, with no passive verb: li lira gagu Peta, the song by Peta. It follows the work, never comes before it.
- An **acclamation** needs no verb: a noun phrase, ala, a noun phrase, and !: Lumisirmo ala Deviasa! Glory to the Great Goddess!
- en rinbakrono is *for ever*. toda-krono, always, is unchanged.
- A bare noun or number on both sides of krotiapo is *one after another*, opening the sentence like a scene-setter: una krotiapo una, one by one; velu krotiapo velu, star after star.
- A matter of style, not grammar: keep the ascended forms for what is truly divine, and let a change of form mark a change of nearness.

> li lira gagu Peta
> the song by Peta
>
> Lumisirmo ala Deviasa!
> Glory to the Great Goddess!
>
> Benaseno ala taivo, iya Lumimare!
> Praise to you, O Mother of Light!
>
> Saivo futu lirala en rinbakrono.
> She will sing for ever.
>
> Una krotiapo una, li veluri po hiro lirala.
> One by one, the stars began to sing.
>
> Maivo lirajubala ala taivo.
> I offer you a song.

WATCH OUT ~~Peta gagu li lira~~ gagu follows the work, never precedes it.

TRY IT

▼ “She will sing for ever.”

Saivo futu lirala en rinbakrono.

▼ “Glory to the Great Goddess!”

Lumisirmo ala Deviasa!

Rules: 3.0:G136 · 3.0:G137 · 3.0:G139 · 3.0:G140 · 3.0:G141

The whole sentence on one page

Every sentence fits this frame. Brackets are optional; the order never changes.

```
[iya VOCATIVE,] [ata · oro · nara] [FRAME,] [TOPIC hozi,] [ki-word]
SUBJECT [, apposition,]  [po · futu] [noma] [ne] [povi · nosi · musi …] [tavki] [hiro · teki] [telvo …] [roni · tefa · sahi] [reve · loki · bodu]
VERB  [OBJECT]  [adjuncts: en …, la …, tamo …, time words]  [fuyi]  [seye · mufe · poye · pifu]  [ki]  [, (iya) vocative]
```

And every noun phrase fits this one:

```
[toda · muya …] [li · baba · eli · OWNER de] [una-ne] [dossa] [ruli] [adjective] NOUN-ti-ri [sela] [de …] [gagu …] [raho …]
```

Still being decided

A living language: these points are not yet ruled. Avoid them for now.

- The order of two adjectives before one noun.
- How to say *for two days* (a duration): en rinbakrono covers only *for ever*.
- How to compare actions with no adjective (*I sing more than you*).
- kasi before a quantifier (kasi muya, *more*): only kasi + a noun is ruled.
