Welcome

Liraasa is a constructed language **built for singing**: open syllables, pure vowels, penultimate stress and a regular morphology, so lyrics scan and rhyme predictably.

What this guide covers

This is the grammar of Liraasa 1.1: all of 1.0, the 1.1 vocabulary supplement, and the 1.2 grammar rulings. It starts with the sound, moves to words and the core vocabulary, then the small words and the clause, then recipes for turning English into Liraasa, every ruling, and finally how a machine reads a line.

It is written for three readers at once: the songwriter who writes and sings in Liraasa, a learner coming from English, and anyone rebuilding the parser, who needs the rules stated exactly.

At a glance

	Count
Headwords	**1,418**: 407 primal roots, 1,011 compounds (319 new in 1.1)
Word forms	9,926, seven per headword; 6,460 are unused and have no meaning
Function words	149
Pronouns	8
Correlatives	36, a 6 × 6 grid
Time words	43 rows, 40 distinct forms
Colours	9 families, 45 words; none is a headword
Discourse particles	4
Rhyme families	387
Examples	586 (581 live, 5 historical)
Rulings	0.8: 20 carried · 1.0: 23 · 1.2: 8 · plus ADR-0011

How to read it

- Liraasa is set in a serif face and its own colour, like lira, and is never re-spelled or hyphenated for display. Every example is a Liraasa line with its English underneath.
- Each ruling carries a badge with its **edition-qualified id**, such as `1.0:G7` or `1.2:G27`. G1–G8 exist in both the 0.8 and 1.0 ruling sets with different content, so a bare id is never used.
- Two notes recur: a **Singing note** for meter, rhyme and free choices, and a **Parsing note** for how a machine decides.
- Every example is canon, taken from the lexicon. Nothing here invents a word.

> ♪ **SINGING NOTE**
>
> Every vowel is its own syllable and stress falls on the second-to-last. Once you know that, you can scan any line by counting vowels.

> ⚙ **PARSING NOTE**
>
> Where this guide and the lexicon JSON disagree, the JSON wins.

2

Sound

The spelling is phonetic: what you see is what you sing.

Letters

Aspect	Rule
Vowels	a e i o u (pure); adjacent vowels are separate syllables
Core consonants	l m n r s v y
Other consonants	b d p t g h z k c f j (sh, ch only in colour/number words)
Stress	penultimate syllable

Syllables and stress

Every vowel is its own syllable, because adjacent vowels never merge. A consonant between vowels starts the next syllable; of two consonants, the first closes the syllable before. Stress falls on the second-to-last syllable. The capitals below mark it.

Word	Syllables and stress
lira	`LI-ra` /ˈli.ra/ 2 syl.
maivo	`ma-I-vo` /ma.ˈi.vo/ 3 syl.
opioa	`o-pi-O-a` /o.pi.ˈo.a/ 4 syl.
benaasasan	`be-na-a-SA-san` /be.na.a.ˈsa.san/ 5 syl.
krono	`KRO-no` /ˈkro.no/ 2 syl.
amor	`A-mor` /ˈa.mor/ 2 syl.

> ♪ **SINGING NOTE**
>
> maivo is ma-i-vo, three syllables, not two. opioa is o-pi-o-a, four. Hiatus vowels may glide in fast singing without changing the spelling.

Templates for new words

Kind	Template
New root	two syllables, consonant-initial, vowel-final, letters from the inventory, no initial cluster (kr-, tr- grandfathered), no three-consonant cluster, no doubled letter, at least two edits from every active word
Function word	one to three syllables, vowel-final, no initial cluster; at least two edits from every active word; monosyllables may sit one edit from another monosyllable only if they belong to different syntactic positions (declared list)
Protected exceptions	amor; apok; opi→opioa; 36 amor- double-a roots (legacy canon); kr-, tr- initial clusters
Declared one-edit pairs	mavo / maivo; lira / zira; peli / eli; somu / somi; pensa / penta; ka / ke; ki / ka; si / su; da / de; po / ko; tu / su

> ! **TAKE CARE**
>
> The protected-exceptions label says “36 amor- double-a roots”. That count is from 0.8: these are compounds, and 1.0 has **39** of them (20 ending in amor, 19 beginning with it). The label is scheduled for repair.

Rhyme

Every headword belongs to a rhyme family by its ending: 387 families in all. Each featured word in Part 4 lists its rhymes.

3
Words

Every content word is a headword with seven forms, built by rule. Learn the seven suffixes once and you can read every word in the lexicon.

The seven forms

Every headword has exactly seven forms, built from its root R. Here they are for bena, good:

#	Slot	Rule	bena	Meaning
1	root	`R`	bena	Good, Moral, Helpful
2	ascended	`R+asa`	benaasa	The ultimate good, righteous
3	negative	`R+na`	benana	Wrong, Immoral, Bad, Evil
4	verb	`VERB`	benaba	To do good
5	negative adjective	`R+nasan`	benanasan	bad; unethical
6	adjective	`R+san`	benasan	good; moral
7	ascended adjective	`R+asasan`	benaasasan	supremely righteous

> ⚙ **PARSING NOTE**
> The forms object is stored in two key orders (80 entries put the verb second). Read forms by key, never by position.

> ♪ **SINGING NOTE**
> The ascended forms in `-asa` and `-asasan` make a line sacred in register. Choose them for hymn-like moments; they add two syllables.

The verb rule

The verb is the only form that is not a plain suffix. It depends on the first letter of the word:

Root begins with	Verb	Example
opi	opioa	opi → opioa
n-initial	R+nia	nedu → nedunia
s-initial	R+sia	sabe → sabesia
vowel-initial	R+a	amor → amora
otherwise	R + first consonant + a	lira → lirala

opi, hope, is a real headword, so opioa is live data, not a reserved case. A compound takes the verb class of its first letter.

Suffixes and derivations

Order: **ROOT + (one form OR one derivation) + -ti + -ri**. A word takes one form or one derivation, then `-ti`, then `-ri` (settled question 4).

Suffix	Meaning
`-ti`	diminutive
`-ri`	plural (always last)
`-yo`	agent (on the root)
`-vu`	augmentative (on the root)
`-pago`	place (mavo+pago blocked; mavopago = society only)

Some derivations carry fixed meanings `1.0:G20`:

Word	Meaning
tisebitivu	sword (big knife): tisebiti + -vu
tibivu	rope (big thread): tibi + -vu
kaldopago	prison (place of confinement): kaldo + -pago
zeldoyo	rebel; resister: zeldo + -yo
kronopago	anniversary (0.8 canon time word): krono + -pago

Compounds

A compound is MODIFIER + HEAD written together, head last: lunolumi is moon-light. Both components must be active headwords, and every compound has exactly two components, so its spelling is just the two joined. One compound is nested: mudusomubiti = mudu + somubiti.

A compound is **one word**, never two nouns side by side (ADR-0011). Its verb class follows its first letter.

Motion prefixes

closed list; only on motion verbs and the listed metaphors; not productive.

Prefix	Meaning
`va-`	toward the speaker
`du-`	away; giving away
`taro-`	across
`yave-`	together, to meet
`revo-`	back, again (curated metaphors: revo-vimova, revo-lirala)

Retired: <code class="morph">lu-</code> → keleka (climb, rise); <code class="morph">nu-</code> → nevra (descend); <code class="morph">mi-</code> → turna (enter); <code class="morph">so-</code> → duvla (exit) / sudeseno (announce).

Registers

- Entries are everyday or poetic only. There is no sacred word list (`0.8:R10`).
- Texts are everyday, poetic or sacred. Sacred is a property of the form (`-asa` , `-asasan`), not of the entry.
- Irreverent is an optional tone flag on a text, never on a lexicon entry.

Retired spellings

63 roots were retired and 7 respelled in 1.0. Retired spellings are reserved until 2.0. A pre-1.0 text is read with the 0.8 lexicon (`1.0:G19`), and a parser warns on a pre-1.0 spelling and names its replacement.

4

The core vocabulary

20 words a songwriter reaches for most, each broken down completely: all seven forms with their sound, the verb rule it follows, its inflections, the compounds built on it, its rhymes and how canon uses it.

> **! TAKE CARE**
> A slot glossed "— (unused)" is shown struck through and greyed. It has **no meaning**, so never give it one and never use it in a line (0.8:R2).

Light and darkness

The sky words that carry most of the imagery in the songs.

lumi Light

Primal · Foundations · everyday · since ≤0.7 · 7 of 7 slots used · `lx_lumi_0302`

`LU-mi` /ˈlu.mi/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	lumi	`LU-mi` /ˈlu.mi/ 2 syl.	Light
2	Ascended (sacred) `R+asa`	lumiasa	`lu-mi-A-sa` /lu.miˈa.sa/ 4 syl.	Divine Light, God
3	Negative `R+na`	lumina	`lu-MI-na` /luˈmi.na/ 3 syl.	Without Light
4	Verb `VERB`	lumila	`lu-MI-la` /luˈmi.la/ 3 syl.	To Shine

#	Slot	Form	Sound	Meaning
5	Negative adjective `R+nasan`	luminasan	`lu-mi-NA-san` /lu.mi.ˈna.san/ 4 syl.	Without Light (Ireedeemable)
6	Adjective `R+san`	lumisan	`lu-MI-san` /lu.ˈmi.san/ 3 syl.	Bright
7	Ascended adjective `R+asasan`	lumiasasan	`lu-mi-a-SA-san` /lu.mi.a.ˈsa.san/ 5 syl.	Divine, Holy

lumi is consonant-initial, so R + its first consonant + a: lumila.

> ⚙ **PARSING NOTE**
> Before another noun, lumi does not stand bare: use its adjective lumisan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
lumiti	`-ti`	little light (diminutive)
lumiri	`-ri`	light, plural
lumitiri	`-ti` + `-ri`	little light, plural

Derivations found in canon

Word	Suffix	Meaning	Source
lumivu	`-vu`	great light	canon example

In compounds (26)

As the modifier (first)

lumibiti lamp

lumikemye light switch

luminavu clear sky filled with light

luminevlo luminous snow; snow under the influence of light

lumirenli luminous rain; rain arriving with light

As the head (last)

lorelumi light in a beloved face

lunolumi moonlit light; a light that reveals moonlight

mavolumi Soul (Mind Light)

mernolumi dawn

lumirinba luminous ring; a small circular pledge of light

lumivera Meaning (Light of truth)

lumiyalmu radiant energy

nevlolumi snow-softened light; a light that reveals falling snow

norulumi dream-born light; a light that reveals dreams

nullolumi night-hidden light; a light that reveals night

ramulumi remembered light; a light that reveals memory

renlilumi rain-washed light; a light that reveals rain

ruhelumi storm-tossed light; a light that reveals a storm

and 8 more

Rhymes

lorelumi · lunolumi · mavolumi · mernolumi · nevlolumi · norulumi · nullolumi · ramulumi · renlilumi · ruhelumi · silrolumi · sovelumi and 6 more

In canon (6 examples)

Li lumi ke yalmusan.
Light is energy-bearing.

Li veluri ka lumisan.
The stars are bright.

Li dossa veluri lumila.
The two stars shine.

li amorsan; li lumiasasan
the beloved; the Holy One

English that finds it: light, to shine, bright, without light

narvo Darkness

Primal | Foundations | everyday | since ≤0.7 | 7 of 7 slots used | `lx_narvo_0460`

NAR-vo /ˈnar.vo/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	narvo	NAR-vo /ˈnar.vo/ 2 syl.	Darkness
2	Ascended (sacred) `R+asa`	narvoasa	nar-vo-A-sa /nar.vo.ˈa.sa/ 4 syl.	Infernal Darkness, Demons
3	Negative `R+na`	narvona	nar-VO-na /nar.ˈvo.na/ 3 syl.	Without Darkness
4	Verb `VERB`	narvonia	nar-vo-NI-a /nar.vo.ˈni.a/ 4 syl.	To darken or obscure
5	Negative adjective `R+nasan`	narvonasan	nar-vo-NA-san /nar.vo.ˈna.san/ 4 syl.	Without Darkness (Saintly), Flawless, Innocent
6	Adjective `R+san`	narvosan	nar-VO-san /nar.ˈvo.san/ 3 syl.	Dark
7	Ascended adjective `R+asasan`	narvoasasan	nar-vo-a-SA-san /nar.vo.a.ˈsa.san/ 5 syl.	Demonic, Evil

narvo is n-initial, so R + `-nia`: narvonia.

> ⚙ **PARSING NOTE**
> Before another noun, narvo does not stand bare: use its adjective narvosan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
narvoti	`-ti`	little darkness (diminutive)
narvori	`-ri`	darkness, plural
narvotiri	`-ti` + `-ri`	little darkness, plural

In compounds (1)

As the modifier (first)

narvolore heartbreak

As the head (last)

None.

In canon (2 examples)

Li nazru de li domlu ke narvosan.
The back of the house is dark.

Li riznosilda de li nulu ke narvosan.
The right side of the path is dark.

English that finds it: darkness, to darken, obscure, dark, without darkness

sulba sun

Primal | Nature | everyday | since ≤0.7 | 7 of 7 slots used | `lx_sulba_0853`

SUL-ba /ˈsul.ba/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	sulba	SUL-ba /ˈsul.ba/ 2 syl.	sun
2	Ascended (sacred) `R+asa`	sulbaasa	sul-ba-A-sa /sul.ba.ˈa.sa/ 4 syl.	sun beyond suns
3	Negative `R+na`	sulbana	sul-BA-na /sul.ˈba.na/ 3 syl.	sunlessness
4	Verb `VERB`	sulbasia	sul-ba-SI-a /sul.ba.ˈsi.a/ 4 syl.	to warm or illuminate like the sun
5	Negative adjective `R+nasan`	sulbanasan	sul-ba-NA-san /sul.ba.ˈna.san/ 4 syl.	sunless
6	Adjective `R+san`	sulbasan	sul-BA-san /sul.ˈba.san/ 3 syl.	sunlit
7	Ascended adjective `R+asasan`	sulbaasasan	sul-ba-a-SA-san /sul.ba.a.ˈsa.san/ 5 syl.	radiant beyond day

sulba is s-initial, so R + `-sia`: sulbasia.

> ⚙ **PARSING NOTE**
> Before another noun, sulba does not stand bare: use its adjective sulbasan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
sulbati	`-ti`	little sun (diminutive)
sulbari	`-ri`	sun, plural
sulbatiri	`-ti` + `-ri`	little sun, plural

In compounds (26)

As the modifier (first)

sulbaamor sun-warmed love; a kind of love that carries sunshine

sulbabanu sun-warmed branch; a branch bearing traces of sunshine

sulbafasbi sun-warmed face; the expression on a face touched by sunshine

sulbafolni sunflower; bright blossom turning toward sunlight

sulbaganre sun-warmed garden; a planted refuge for sunshine

sulbalore sun-warmed heart; a heart changed by sunshine

sulbalumi sun-warmed light; a light that reveals sunshine

sulbanavu sun-warmed sky; the sky colored by sunshine

sulbanevlo sun-warmed snow; snow under the influence of sunshine

sulbarenli sun-warmed rain; rain arriving with sunshine

and 8 more

As the head (last)

lunosulba moonlit sun; the sun as felt through moonlight

nevlosulba snowmelt at sunrise; first thaw of a bright morning

renlisulba sunshower; rainfall falling through sunshine

ruhesulba storm-tossed sun; the sun as felt through a storm

sovesulba peaceful sun; the sun as felt through peace

vebosulba spring-awakened sun; the sun as felt through spring

velusulba starlit sun; the sun as felt through distant stars

vesnosulba twilight-soft sun; the sun as felt through evening

Rhymes

lunosulba · nevlosulba · renlisulba · ruhesulba · sovesulba · vebosulba · velusulba · vesnosulba

In canon (2 examples)

> Kube li sulba sulbasia, li larbo larbola.
> When the sun shines, the tree grows.

Kureli li sulba sulbasia, maivori pelipa.

As soon as the sun shines, we play.

English that finds it: sun, to warm, illuminate like the sun, sunlit, sunlessness

luno moon

Primal | Nature | everyday | since ≤0.7 | 7 of 7 slots used | `lx_luno_0310`

LU-no /ˈlu.no/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	luno	LU-no /ˈlu.no/ 2 syl.	moon
2	Ascended (sacred) `R+asa`	lunoasa	lu-no-A-sa /lu.no.ˈa.sa/ 4 syl.	moon of the forgotten
3	Negative `R+na`	lunona	lu-NO-na /lu.ˈno.na/ 3 syl.	moonlessness
4	Verb `VERB`	lunola	lu-NO-la /lu.ˈno.la/ 3 syl.	to glow like moonlight
5	Negative adjective `R+nasan`	lunonasan	lu-no-NA-san /lu.no.ˈna.san/ 4 syl.	moonless
6	Adjective `R+san`	lunosan	lu-NO-san /lu.ˈno.san/ 3 syl.	moonlit
7	Ascended adjective `R+asasan`	lunoasasan	lu-no-a-SA-san /lu.no.a.ˈsa.san/ 5 syl.	moon-blessed

luno is consonant-initial, so R + its first consonant + a: lunola.

> ⚙ **PARSING NOTE**
> Before another noun, luno does not stand bare: use its adjective lunosan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
lunoti	`-ti`	little moon (diminutive)
lunori	`-ri`	moon, plural
lunotiri	`-ti` + `-ri`	little moon, plural

Derivations found in canon

Word	Suffix	Meaning	Source
lunovu	`-vu`	great moon	canon example

In compounds (31)

As the modifier (first)

lunoamor moonlit love; a kind of love that carries moonlight

lunobanu moonlit branch; a branch bearing traces of moonlight

lunobelda moonlit bell; a bell stirred by moonlight

lunofasbi moonlit face; the expression on a face touched by moonlight

lunofolni moonflower; blossom opening after sunset

lunoganre moonlit garden; a planted refuge for moonlight

lunohavli moonlit breath; a breath filled with moonlight

lunojomru moonlit journey; a journey undertaken for moonlight

lunolavlo moonlit leaf; a leaf colored or moved by moonlight

lunolira moonlit song; a melody given the color of moonlight

and 21 more

As the head (last)

None.

English that finds it: moon, to glow like moonlight, moonlit, moonlessness

velu star

Primal · Nature · everyday · since ≤0.7 · 7 of 7 slots used · `lx_velu_0989`

`VE-lu` /ˈve.lu/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	velu	`VE-lu` /ˈve.lu/ 2 syl.	star
2	Ascended (sacred) `R+asa`	veluasa	`ve-lu-A-sa` /ve.lu.ˈa.sa/ 4 syl.	ancestral star
3	Negative `R+na`	veluna	`ve-LU-na` /ve.ˈlu.na/ 3 syl.	starlessness
4	Verb `VERB`	veluva	`ve-LU-va` /ve.ˈlu.va/ 3 syl.	to shine like a star
5	Negative adjective `R+nasan`	velunasan	`ve-lu-NA-san` /ve.lu.ˈna.san/ 4 syl.	starless
6	Adjective `R+san`	velusan	`ve-LU-san` /ve.ˈlu.san/ 3 syl.	starlit
7	Ascended adjective `R+asasan`	veluasasan	`ve-lu-a-SA-san` /ve.lu.a.ˈsa.san/ 5 syl.	star-crowned

velu is consonant-initial, so R + its first consonant + a: veluva.

> ⚙ **PARSING NOTE**
> Before another noun, velu does not stand bare: use its adjective velusan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
veluti	`-ti`	little star (diminutive)
veluri	`-ri`	star, plural
velutiri	`-ti` + `-ri`	little star, plural

Derivations found in canon

Word	Suffix	Meaning	Source
veluvu	`-vu`	huge star	canon example

In compounds (29)

As the modifier (first)

veluamor starlit love; a kind of love that carries distant stars

velubelda starlit bell; a bell stirred by distant stars

velufasbi starlit face; the expression on a face touched by distant stars

velufolni starlit blossom; a flower that evokes distant stars

veluganre starlit garden; a planted refuge for distant stars

velujomru starlit journey; a journey undertaken for distant stars

velulamsa stardust; pale cosmic dust among the stars

velulavlo starlit leaf; a leaf colored or moved by distant stars

velulira starlit song; a melody given the color of distant stars

velulore starlit heart; a heart changed by distant stars

and 19 more

As the head (last)

None.

In canon (6 examples)

Li veluri ka lumisan.
The stars are bright.

Li dossa veluri lumila.
The two stars shine.

Li velu yalmuya li vemi.
The star energizes the world.

Li veluri po hiro lirala.
The stars began to sing.

English that finds it: star, to shine like a star, starlit, starlessness

The heart

Feeling, from love to grief. opi *is here because it owns the one irregular verb.*

amor Love

Primal | Established concepts | everyday | since ≤0.7 | 7 of 7 slots used | lx_amor_0001

A-mor /ˈa.mor/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun R	amor	A-mor /ˈa.mor/ 2 syl.	Love
2	Ascended (sacred) R+asa	amorasa	a-mo-RA-sa /a.mo.ˈra.sa/ 4 syl.	The ultimate love, soulmate
3	Negative R+na	amorna	a-MOR-na /a.ˈmor.na/ 3 syl.	enemy, one who is hated
4	Verb VERB	amora	a-MO-ra /a.ˈmo.ra/ 3 syl.	to love; to care for
5	Negative adjective R+nasan	amornasan	a-mor-NA-san /a.mor.ˈna.san/ 4 syl.	hateful; unloving
6	Adjective R+san	amorsan	a-MOR-san /a.ˈmor.san/ 3 syl.	loving; affectionate

#	Slot	Form	Sound	Meaning
7	Ascended adjective `R+asasan`	amorasasan	`a-mo-ra-SA-san` /a.mo.ra.ˈsa.san/ 5 syl.	divinely romantic

amor is vowel-initial, so R + `-a` : amora.

> ⚙ **PARSING NOTE**
> Before another noun, amor does not stand bare: use its adjective amorsan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
amorti	`-ti`	little love (diminutive)
amorri	`-ri`	love, plural
amortiri	`-ti` + `-ri`	little love, plural

In compounds (40)

As the modifier (first)

amorbanu loving branch; a branch bearing traces of love

amorfasbi loving face; the expression on a face touched by love

amorfolni loving blossom; a flower that evokes love

amorganre loving garden; a planted refuge for love

amorharlu romantic jealousy

amorhavli loving breath; a breath filled with love

amorjomru loving journey; a journey undertaken for love

amorlira loving song; a melody given the color of love

amormanli loving hands; hands marked by love

amorpeli flirtation; playful courtship

and 10 more

As the head (last)

devoamor faithful love; a kind of love that carries faith

humeamor humble love; a kind of love that carries humility

laviamor joyful love; a kind of love that carries delight

lunoamor moonlit love; a kind of love that carries moonlight

meraamor merciful love; a kind of love that carries mercy

nemeamor grief remade as love

nilvuamor wintering love; a kind of love that carries winter

nolsaamor first love

noruamor dream-born love; a kind of love that carries dreams

ramuamor remembered love; a kind of love that carries memory

and 10 more

Rhymes

devoamor · humeamor · laviamor · lunoamor · meraamor · nemeamor · nilvuamor · nolsaamor · noruamor · ramuamor · renliamor · silroamor and 8 more

In canon (11 examples)

Maivo amora taivo.
I love you.

Maivori amora fuyi.
We love each other.

Maivo amora sidu rilura.
I love to dance.

Ki-eli lira taivo amora?
Which song do you love?

English that finds it: love, to love, to care for, loving, affectionate, enemy, one who is hated

lore heart; emotional center

Primal | Body | everyday | since ≤0.7 | 7 of 7 slots used | `lx_lore_0286`

`LO-re` /ˈlo.re/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	lore	`LO-re` /ˈlo.re/ 2 syl.	heart; emotional center
2	Ascended (sacred) `R+asa`	loreasa	`lo-re-A-sa` /lo.reˈa.sa/ 4 syl.	heart larger than sorrow
3	Negative `R+na`	lorena	`lo-RE-na` /loˈre.na/ 3 syl.	heartlessness
4	Verb `VERB`	lorela	`lo-RE-la` /loˈre.la/ 3 syl.	to open one's heart

verasimvo honesty

verasude evidence; proof offered

As the head (last)

devovera promise kept

lumivera Meaning (Light of truth)

maskavera deception

Rhymes

devovera · lumivera · maskavera

In canon (8 examples)

Vera ki?
Really?

Ola ka vera.
That's true.

Li vera ka sernasan poye.
Truth is informational, perhaps.

La vera, maivo po bumreba ito.
Actually, I baked it.

English that finds it: to speak truth, to verify a statement, honest, truthful, lie, falsehood, deceit

krono Time

Primal | Foundations | everyday | since ≤0.7 | 7 of 7 slots used | 1x_krono_0193

KRO-no /ˈkro.no/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun R	krono	KRO-no /ˈkro.no/ 2 syl.	Time
2	Ascended (sacred) R+asa	kronoasa	kro-no-A-sa /kro.no.ˈa.sa/ 4 syl.	the end of time or the beginning of time
3	Negative R+na	kronona	kro-NO-na /kro.ˈno.na/ 3 syl.	Without time
4	Verb VERB	kronoka	kro-NO-ka /kro.ˈno.ka/ 3 syl.	To measure time
5	Negative adjective R+nasan	krononasan	kro-no-NA-san /kro.no.ˈna.san/ 4 syl.	Without time, late, running out of time, in a hurry
6	Adjective R+san	kronosan	kro-NO-san /kro.ˈno.san/ 3 syl.	Timely
7	Ascended adjective R+asasan	kronoasasan	kro-no-a-SA-san /kro.no.a.ˈsa.san/ 5 syl.	Beyond Time, Timeless,

krono is consonant-initial, so R + its first consonant + a: kronoka.

> ⚙ **PARSING NOTE**
> Before another noun, krono does not stand bare: use its adjective kronosan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
kronoti	`-ti`	little time (diminutive)
kronori	`-ri`	time, plural
kronotiri	`-ti` + `-ri`	little time, plural

Derivations found in canon

Word	Suffix	Meaning	Source
kronopago	`-pago`	anniversary (0.8 canon time word): krono + -pago	lexicalised (1.0:G20)

In compounds (22)

As the modifier (first)

kronobelda chime of the hour; a clock bell

kronobio Birth (Time of Life)

kronobiti clock

kronocunu frequency

kronoharlu urgency

kronolalni duration

kronolemvo boredom; tedium

kronoleto schedule; timetable

kronolinu later descendant

kronopatu period or era

and 11 more

As the head (last)

talikrono work shift

In canon (1 example)

> Li vamri ata li krono ka tilmasan seye.
> Space and time are related, certainly.

English that finds it: time, to measure time, timely, without time

nimu home; belonging and refuge, not necessarily a building

Primal | Home & objects | everyday | since ≤0.7 | 7 of 7 slots used | `lx_nimu_0526`

`NI-mu` /ˈni.mu/ 2 syl.

#	Slot	Form	Sound	Meaning
1	Root noun `R`	nimu	`NI-mu` /ˈni.mu/ 2 syl.	home; belonging and refuge, not necessarily a building
2	Ascended (sacred) `R+asa`	nimuasa	`ni-mu-A-sa` /ni.mu.ˈa.sa/ 4 syl.	a home promised beyond life
3	Negative `R+na`	nimuna	`ni-MU-na` /ni.ˈmu.na/ 3 syl.	homelessness
4	Verb `VERB`	nimunia	`ni-mu-NI-a` /ni.mu.ˈni.a/ 4 syl.	to offer belonging; to make someone feel at home
5	Negative adjective `R+nasan`	nimunasan	`ni-mu-NA-san` /ni.mu.ˈna.san/ 4 syl.	homeless
6	Adjective `R+san`	nimusan	`ni-MU-san` /ni.ˈmu.san/ 3 syl.	at home; cherished
7	Ascended adjective `R+asasan`	nimuasasan	`ni-mu-a-SA-san` /ni.mu.a.ˈsa.san/ 5 syl.	sacredly welcoming

nimu is n-initial, so R + `-nia`: nimunia.

> ⚙ **PARSING NOTE**
> Before another noun, nimu does not stand bare: use its adjective nimusan (ADR-0011).

Regular inflections of the noun

Word	Suffix	Reads as
nimuti	`-ti`	little home (diminutive)
nimuri	`-ri`	home, plural
nimutiri	`-ti` + `-ri`	little home, plural

Derivations found in canon

Word	Suffix	Meaning	Source
nimuvu	`-vu`	great home	canon example
nimupago	`-pago`	homestead	canon example

In compounds (8)

As the modifier (first)

nimujomru homelike journey; a journey undertaken for a safe home

nimulazu pet

nimununulu road home

nimupomli homelike promise; a vow entrusted to a safe home

nimuvorba homesickness

As the head (last)

lazunimu animal den

norunimu unseen home

renlinimu rain-shelter; home feeling during a downpour

Rhymes

norunimu · renlinimu

In canon (2 examples)

> Miyo baba sora en li nimu.
> There is a friend in the home.

> Taivo ka li lanvetovoyo, nara eli-pago ka maivo de nimu.
> You are the legal owner, but this place is my home.

English that finds it: home, belonging, hearth, refuge, household, homeland, shelter

Reference: more core roots

The 60 primal roots below are the most productive after the featured ones, ranked by how many compounds use them and listed alphabetically. Four of the seven forms are shown; the other three follow by rule (`-asasan`, `-nasan` and the root itself), and a dash marks a slot that is unused and has **no meaning**. The full forms of every headword are in the lexicon.

Root	Meaning	Verb	Adjective	Negative	Ascended	Compounds
banu	branch	banuba to branch	banusan branched	—	—	10
belda	bell	beldaba to ring	beldasan ringing	—	—	9
bena	Good, Moral, Helpful	benaba To do good	benasan good; moral	benana Wrong, Immoral, Bad, Evil	benaasa The ultimate good, righteous	9
biti	tool; implement	bitiba to use a tool; to craft	—	—	—	30

samni	seed	samnisia to sow seed	—	samnina barrenness	samniasa the seed of worlds	13
savali	kiss	savalisia to kiss	savalisan kissed	—	—	20
seno	Word	senosia to speak; to say	senosan verbal; spoken	senona wordlessness	—	24

Root	Meaning	Verb	Adjective	Negative	Ascended	Compounds
senru	skin	senrusia to shed skin; to molt	—	—	—	22
sevu	Sea	sevusia to sail; to move across the sea	sevusan oceanic; tidal	sevuna landlockedness	—	12
silro	secret	silrosia to conceal a secret	—	silrona disclosure	—	18
sonbu	sound	sonbusia to sound; to resonate	—	sonbuna silence	—	21
suma	Warmth	sumasia to warm; to comfort	sumasan warm; comforting	sumana chill	—	12
tali	Work	talita to work; to labor	talisan working; industrious	talina idleness	—	14
tamra	land	tamrata to settle on land	tamrasan landed	—	—	11
tilma	relation; bond; connection between things or people	tilmata to relate; to connect	tilmasan related; connected	tilmana disconnection; absence of relation	tilmaasa the bond of all beings	13
vaye	Wind	vayeva to blow; to drift with wind	vayesan breezy; windborne	vayena still air	—	49
vebo	spring	vebova to spring forth	vebosan springlike	vebona winter	veboasa spring that remakes the world	13
velma	clothing	velmava to dress; to clothe	—	—	—	14

Root	Meaning	Verb	Adjective	Negative	Ascended	Compounds
vilne	eye; visual organ	vilneva to look at; direct one's gaze	vilnesan wide-eyed	vilnena blindness	vilneasa an all-seeing eye	13
vorba	Longing	vorbava to yearn; to long for	vorbasan yearning; wistful	vorbana fulfilment	—	10
vulra	wound	vulrava to wound	vulrasan wounded	—	—	14
yano	Unity	yanoya to unite; to join	yanosan united; together	yanona division	—	10
yelfa	ice	yelfaya to freeze	yelfasan icy	yelfana thaw	yelfaasa the first frozen sea	20
yuge	body	yugeya to embody	yugesan bodily	—	—	16

5
The small words

Pronouns, correlatives, numbers, colours and particles: closed classes, each with its own pattern. The full tables are in the appendices.

Pronouns

Form	Person	Number	Possessive	Reflexive
maivo	First person	Singular	maivo de lira my song	maivo sela myself
taivo	Second person	Singular	taivo de lira	taivo sela
saivo	Third person	Singular human / person	saivo de lira	saivo sela
maivori	First person	Plural	maivori de lira	maivori sela
taivori	Second person	Plural	taivori de lira	taivori sela
saivori	Third person	Plural people	saivori de lira	saivori sela
ito	Third person	Singular inanimate	ito de nole	ito sela
itori	Third person	Plural inanimate	itori de nole	itori sela

> ⚙ **PARSING NOTE**
> maivo is both a pronoun and a root. A spelling can belong to more than one namespace, so a word index maps a spelling to a list, never to one entry.

Correlatives: determiner + concept

	coda	pago	krono	nela	modo	kasa
ki	ki-coda what	ki-pago where	ki-krono when	ki-nela who	ki-modo how	ki-kasa why

	coda	pago	krono	nela	modo	kasa
eli	eli-coda this thing	eli-pago here	eli-krono now	eli-nela this person	eli-modo in this way	eli-kasa for this reason
ola	ola-coda that thing	ola-pago there	ola-krono then	ola-nela that person	ola-modo in that way	ola-kasa for that reason
toda	toda-coda everything	toda-pago everywhere	toda-krono always	toda-nela everyone	toda-modo in every way	toda-kasa for every reason
nuna	nuna-coda nothing	nuna-pago nowhere	nuna-krono never	nuna-nela no one	nuna-modo in no way	nuna-kasa for no reason
somi	somi-coda something	somi-pago somewhere	somi-krono sometime	somi-nela someone	somi-modo somehow	somi-kasa for some reason

Correlatives of place, time, manner and cause (`-pago`, `-krono`, `-modo`, `-kasa`) work as adverbials. Those of thing and person (`-coda`, `-nela`) work as nouns.

Numbers

Value	Word
0	zira
1	una
2	dossa
3	tressa
4	cuara
5	penta
6	sesa
7	seta
8	ocha
9	niva

Ten is unzira, and the tens to fifty are contracted: dozira, trezira, cuazira, penzira. A unit joins with a hyphen: dozira-cuara, 24. One hundred is centa; a thousand mililumi.

Ordinals take `-ne`: una-ne, first. Fractions are NUMBER de NUMBER: tressa de cuara, three quarters. A ne after a number is never negation (settled question 6).

Colours

Nine families, each a base and four shades. They are a closed class of their own: no colour is a headword. They are the only words that use sh and ch.

Family	Base	+narvo dark	+bio life	+juba gem	+lumi light
Red	rubi	rubinarvo	rubibio	rubijuba	rubilumi
Orange	ojo	ojonarvo	ojobio	ojojuba	ojolumi
Yellow	aurumi	auruminarvo	aurumibio	aurumijuba	aurumilumi
Blue	azuri	azurinarvo	azuribio	azurijuba	azurilumi
Green	verde	verdenarvo	verdebio	verdejuba	verdelumi
Violet	vio	vionarvo	viobio	viojuba	violumi
Black	shada	shadanarvo	shadabio	shadajuba	shadalumi
White	vana	vananarvo	vanabio	vanajuba	vanalumi
Brown	erta	ertanarvo	ertabio	ertajuba	ertalumi

Discourse particles

Particle	Function	Where
hema	hesitation; holding the floor ("well…", "um")	clause-initial; between constituents; standalone
nido	self-repair: cancels the speaker's own preceding word, phrase or clause and replaces it ("I mean", "rather", "no —")	immediately after the abandoned item and before its replacement; or clause-initial to reformulate a whole previous utterance

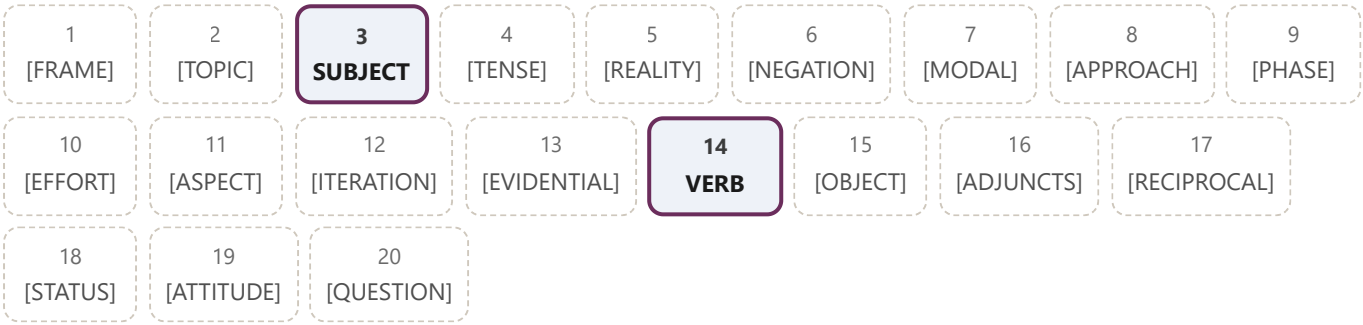

Particle	Function	Where
yori	topic return / closure ("anyway", "at any rate"); with a possessive seno phrase, resumption ("as I was saying")	clause-initial; standalone
zoke	irony / sarcasm: the speaker does not endorse, or mocks, the proposition	clause-final, in the attitude slot (instead of seye/mufe/poye/pifu); may precede ki; standalone

6

The clause

A Liraasa clause is a row of twenty slots in a fixed order, anchored on the verb. Only the subject and the verb are required.

The 20-slot template

The 20 slots in order. SUBJECT and VERB are required (solid); every bracketed slot is optional. The order is fixed.

```
[FRAME] [TOPIC hozi] SUBJECT [TENSE] [noma] [ne] [MODAL] [APPROACH] [PHASE] [EFFORT] [ASPECT] [ITERATION]
[EVIDENTIAL] VERB [OBJECT] [ADJUNCTS] [fuyi] [hoyo|yasmo] [ATTITUDE] [ki]
```

#	Slot	Words	Notes
1	**FRAME**	time words, correlatives of time, zafra, finra, lanto, kenvi	clause-initial; followed by a pause
2	**TOPIC**	NP + hozi	optional; at most one per clause except paired contrastive topics in parallel clauses
3	**SUBJECT**	noun phrase, pronoun	obligatory except in commands, hortatives and permitted ellipsis
4	**TENSE**	po, futu, pressa	none = present
5	**REALITY**	noma	counterfactual

#	Slot	Words	Notes
6	**NEGATION**	ne	floats: may also stand before any later operator or the verb, negating what follows
7	**MODAL**	povi, nosi, dagi, musi, suvi, viki, kopi	one per clause
8	**APPROACH**	tavki, fututi	almost / about to
9	**PHASE**	hiro, teki	begin / stop
10	**EFFORT**	telvo, vazdi, fesmo	try / manage / try and fail
11	**ASPECT**	roni, tefa, sahi	progressive / completed / habitual
12	**ITERATION**	bodu, reve, loki	already / again / still; reve and loki may instead close the clause
13	**EVIDENTIAL**	yehu, gesu, bisu, vuda, buyu, tosu	one per clause
14	**VERB**	any verb form, copulas ke ka kapoki loya miyo, valency operators vaku lesvu tekvu (+ ACTOR + embedded verb), gome (+ verb)	
15	**OBJECT**	noun phrase	
16	**ADJUNCTS**	prepositional phrases, la + adjective, vobi NP, sabri NP, korsi NP	
17	**RECIPROCAL**	fuyi	
18	**STATUS**	hoyo, yasmo	mirative / shared knowledge
19	**ATTITUDE**	seye, mufe, poye, pifu, zoke	zoke excludes the other four
20	**QUESTION**	ki	last word of its clause

> ⚙ **PARSING NOTE**
>
> SPEC §5.4 quotes an older 10-slot template. The 20-slot template above is the canon.

Scope operators

ne doli tu yesta pendi vinto stand immediately before the constituent they scope over (noun phrase, verb, adjective, number, clause-introducer such as si). Scope runs left over right `1.0:G1`; ne negates everything to its right, up to the verb.

> Maivo po ne somusia.
> I did not sleep.

Stacking

One word per slot. These pairs cannot share a clause `1.0:G16`:

hiro + roni · hiro + tefa · teki + roni · teki + tefa · telvo + tefa · vazdi + tefa · fesmo + tefa · zoke + seye · zoke + mufe · zoke + poye · zoke + pifu · tavki + fututi · hoyo + yasmo

At most 4 pre-verbal operators are recommended.

> ♪ **SINGING NOTE**
> Operators are short and unstressed in the line, so they are good for filling a beat. But four before a verb is the comfortable limit.

Copulas and the verb slot

Word	Meaning	Use
ke	temporary is / are	copula for state or location now
ka	enduring is / are	copula for stable quality
kapoki	previously was	historical copula; po + ka is also regular
loya	become	Subject + [tense] loya + noun/adjective/state
miyo	existential there is / are	miyo + noun phrase (+ location); agreement invariant
gome	passive voice	PATIENT + [TENSE] + gome + TRANSITIVE VERB + [gagu AGENT]

- ke is a temporary state or a location now: li nela ke benasan, the person is good right now. ka is a permanent identity or quality.
- A predicate adjective may also stand bare, with no copula: lira benasan.

- Transitivity is usage-based (settled question 5): gome can passivise any verb used with an object. There is no transitive flag.
- Valency operators vaku (make), lesvu (let) and tekvu (prevent) follow CAUSER [TENSE…] OP ACTOR [ne] [APPROACH] [PHASE] [EFFORT] VERB [OBJECT] `1.0:G14`.

The noun phrase

```
[QUANTIFIER] [li|eli|ola|OWNER de] [NUMBER] [ADJECTIVES] NOUN[-ti][-ri] [de …] [raho CLAUSE]
```

- Order: quantifier, then article or owner, then number, then adjectives, then the noun with `-ti` and `-ri`, then the de phrase, then the relative clause `0.8:G7`.
- **Adjectives come before the noun**, and a noun does not modify a noun (ADR-0011).
- toda N is every N; toda li N is all the N.

Linking clauses

A clause with its own verb is opened by a linker. Two verbs in one clause with no linker is an error.

Word	Meaning	Use
ata	and	connect equal constituents | v0.5: author correction
nara	but / however	contrast two clauses
oro	or	choose among alternatives | v0.5: author correction
si	if	introduces condition
sina	unless	negative condition
kasa	because	introduces cause clause | v0.5: author correction
kopisa	so that / in order to	purpose clause
nevi	although	concessive subordinate clause
fime	complementizer: that	introduces a finite content clause; distinct from relative marker
raho	who / that / which (relative)	relative clause marker | v0.5: author correction
sidu	infinitive / chaining	Between first lexical verb and bare second verb
kube	when (subordinate)	Before time clause, not a question

Word	Meaning	Use
nayo	while (subordinate time)	Introduces simultaneous event clause | v0.5: author correction
tuni	until	Introduces endpoint time clause
sige	since (time)	Introduces beginning point / since-event clause
kureli	as soon as	Introduces immediately-following time relation

- fime opens a content clause, “that …”. The demonstrative “that” is ola.
- raho opens a relative clause. If it does not end the sentence, a comma closes it 1.0:G21.
- sidu joins two verbs that share a subject. It never takes a copula: “hope to become” is kopi loya.
- ala means toward, **never** the infinitive “to”.

Maivo sabesia fime taivo lirala.
I know that you sing.

Li nela raho lirala ka benasan.
The person who sings is good.

Maivo vurlova sidu lirala.
I want to sing.

Questions

A question keeps **statement order** and adds ki as the last word of the clause. Question words are `ki-` correlatives that stay in place; an embedded yes/no question uses si 0.8:G4. The copula is never moved to the front.

Taivo futu relnura ki?
Will you come back?

7

Patterns: English → Liraasa

The recipes a translator follows. Every example is canon.

English	Pattern	Example	Ruling
my / your X	PRONOUN de X	taivo de lira your song	1.2:G27
Father's X	NAME de X	pilo de bumre father's bread	1.2:G27
the X of the Y	li X de li Y	li bumre de li cilni the bread of the city	1.2:G27
a song about love	X de Y	li lira de amor the song of love	1.2:G30
songbird (noun + noun)	first noun → its adjective	lirasan lavra songbird	ADR-0011
two coins	NUMBER NOUN, -ri optional	dossa cono two coins	1.2:G28
the forgotten	article + adjective	li ramumomvisan the forgotten	1.2:G29
owe me two coins	VERB PRONOUN THEME	guraga maivo dossa cono owe me two coins	1.2:G26
lend three coins to me	VERB THEME ala RECIPIENT	rimara tressa cono ala maivo lend three coins to me	1.2:G26
now I sing	time word first or last	Eli-krono, maivo lirala. Now I sing.	1.2:G24
suddenly, …	frame word first, with a comma	Zafra, li dorbi po lallela. Suddenly the door opened.	slot 1
water or food	A oro B	miru oro nami water or food	1.2:G25

English	Pattern	Example	Ruling
did / -ed	po + verb	Saivo po venreva. They arrived.	slot 4
will	futu + verb	Taivo futu relnura ki? Will you come back?	slot 4
not	ne before what it negates	Maivo po ne somusia. I did not sleep.	1.0:G1
is (now) / is (always)	ke / ka	li nela ke benasan the person is good right now	copulas
I know that …	fime + clause	Maivo sabesia fime taivo lirala. I know that you sing.	
the person who sings	raho + clause	Li nela raho lirala ka benasan. The person who sings is good.	1.0:G21
want to sing	VERB sidu VERB	Maivo vurlova sidu lirala. I want to sing.	0.8:G6
command	no subject; fisa = please	Vulravelmava maivo de yendo, fisa. Bandage my palm, please.	1.2:G31
addressing someone	set off by commas	Taivo viki pagopa ligo maivo ki, maivo de amor? Would you come near me, my love?	1.2:G31
perhaps …	attitude word at the clause end	Maivo lirala poye. Perhaps I sing.	1.0:G22

8

Every ruling

Verbatim from the lexicon, grouped by edition, newest first. The 1.2 rulings come from the open-questions review of 2026-10-17 (ADR-0012).

Rulings 1.2 (G24–G31)

1.2:G24 Time words: opening or closing

A time word or time correlative (eli-krono, deyapressa, fututi, ki-krono's answers…) may open its clause or close it. When it opens the clause, the comma after it is optional. Only the four frame words zafra, finra, lanto and kenvi are opening-only, and they keep their comma. *Refines 1.0 slot 1 FRAME.*

Eli-krono, maivo lirala.
Now I sing.

Eli-krono maivo lirala.
Now I sing.

Saivo po venreva pendi eli-krono.
They arrived exactly now.

Zafra, li dorbi po lallela.
Suddenly the door opened.

1.2:G25 oro, alone and paired

A single oro joins two equal constituents, exactly as ata does: miru oro nami, water or food. It may also open a clause or line that continues the one before ("Or ..."). The pair oro A oro B is the emphatic "either A or B". *Refines 1.0:G10.*

> miru oro nami
> water or food

> oro maivo ke li suma ki?
> Or am I the one...?

1.2:G26 Give-type verbs: where the recipient goes

A verb of giving (give, lend, send, owe, sell, pay, bring, teach, show) takes VERB THEME ala RECIPIENT. When the recipient is a pronoun it may instead stand bare straight after the verb: VERB PRONOUN THEME. Any other recipient takes ala.

> Taivo guraga maivo dossa cono.
> You owe me two coins.

> Fisa, rimara tressa cono ala maivo.
> Please lend me three coins.

1.2:G27 Which side of de is the owner

In X de Y the owner is Y, read as English "X of Y": li bumre de li cilni, the bread of the city; li lira de amor, the song of love. One exception: a pronoun or a personal name (pilo, father, used as a name included) standing before de is the owner, read as English "X's Y": maivo de lira, my song; pilo de bumre, father's bread. A pronoun is the owner wherever it stands: li purma de maivo, my parent. Fractions (tressa de cuara) are their own construction. *Refines 1.0:G7.*

Taivo de lira ka vanisan.

Your song is beautiful.

Li bitiri de pilo ka su li tabu.

Father's tools are on the table.

Eli bumre ka sambasan ko pilo de bumre.

This bread is the same as father's bread.

Li bumre de li cilni ka sambanasan da eli bumre.

City bread is different from this bread.

Nullo de deyaapo, maivo po ne somusia.

Last night, I didn't sleep.

1.2:G28 -ri after a number or quantifier

After a number or a quantifier the plural -ri is optional: the number already says how many. Choose by sound and meter. Without a number or quantifier, a plural noun takes -ri. *Refines 1.0:G7.*

Li dossa veluri lumila.
The two stars shine.

Taivo guraga maivo dossa cono.
You owe me two coins.

Maivo po vimova muya jemlari en li folni.
I saw many insects on the flower.

Li vila tovota muya marna.
The village has much grain.

1.2:G29 An adjective standing as a noun

An adjective may stand as a noun phrase on its own only after an article or determiner (li, eli, ola, baba): li ramumomvisan, the forgotten. Without one, an adjective needs its noun. *Refines 1.0:G7.*

yesta li raleri de li sadori de li ramumomvisan po lenila maivori de lira.
even the echoes of the sorrows of the forgotten heard our song

1.2:G30 "About" is de

Liraasa has no word for "about / concerning". A song, story or word about something is a de phrase under G27: li lira de amor, the song of (about) love. After a verb of saying, give the verb an object rather than su: po sarbisia lirari de amor, wrote songs of love.

Li ralelirapatu de li lira ka melosan.
The song's refrain is musical.

Li veluri po sarbisia lirari de amor.
The stars wrote songs of love.

1.2:G31 Commands, address and narrative present

A command has no subject: the clause opens at the verb (slot 3 notes), softened with fisa. A person addressed is a noun phrase set off by commas, at the start or end of the clause. In verse, once the time has been set, the bare present may narrate past events.

> Vulravelmava maivo de yendo, fisa.
> Bandage my palm, please.

> Taivo viki pagopa ligo maivo ki, maivo de amor?
> Would you come near me, my love?

Rulings 1.0

Id	Topic	Ruling
1.0:G1	**Scope by position**	Every preverbal operator scopes over everything to its right. Pre-constituent operators (ne, doli, tu, yesta, pendi, vinto) scope over the single constituent that follows them.
1.0:G2	**si and whether**	si means only 'if'. 'whether' is ki-oro. 0.8 texts that used si for 'whether' are read under 0.8 rules.
1.0:G3	**Permission vs possibility vs ability**	povi = ability; nosi = epistemic possibility (might); dagi = permission (may, be allowed). 0.8's double use of nosi is split.
1.0:G4	**Epistemic necessity**	'must (logically)' = inferential evidential tosu + seye; musi is only obligation or circumstantial necessity.
1.0:G5	**Intention**	Intent is the verb chain 'dorvada sidu VERB' (intend to); kopi is only 'hope to'. Deliberately = la dorvasan; accidentally = la dorvanasan.
1.0:G6	**Counterfactual**	noma marks a clause as contrary to fact. 'should have' = po noma suvi; 'could have' = po noma povi; 'would have' = po viki (in a consequence clause) or po noma viki.
1.0:G7	**Imminence**	fututi in the approach slot means 'about to': Maivo po fututi pagopa = I was about to leave. As a clause-initial time word it still means 'soon'.

Id	Topic	Ruling
1.0:G8	**Continuation**	loki covers both 'still' and 'keep on'; no separate continuative is added.
1.0:G9	**Quantity limits**	Before a number or quantity, lusu = at least, mosa = at most, gase = approximately; pendi = exactly.
1.0:G10	**Paired conjunctions**	oro A oro B = either A or B; ne A ne B = neither A nor B; doli si = only if; yesta si = even if; 'si …, ata doli si …' = if and only if.
1.0:G11	**Despite**	nevi + noun phrase = despite: nevi li zeldo, despite the resistance. nevi + clause = although.
1.0:G12	**Benefactive**	vobi + noun phrase = for the benefit of / on behalf of (unchanged), and combines with any operator.
1.0:G13	**ata**	ata is 'and' only; additive 'also' is tu.
1.0:G14	**Valency operators**	vaku (make), lesvu (let) and tekvu (prevent) fill the verb slot of the main clause; the actor follows, then the actor's own [ne] [phase] [effort] verb. Tense, modal and evidential belong to the main clause only.
1.0:G15	**Negation and operators**	ne before an operator negates the operator; ne after it negates the event: po ne vazdi lirala = didn't manage to sing; po vazdi ne lirala = managed not to sing.
1.0:G16	**Exclusions**	At most one word per slot. hiro/teki do not combine with roni or tefa. tavki excludes fututi (same slot). The effort slot (telvo, vazdi, fesmo) excludes tefa. noma requires a tense, modal or si-clause context.
1.0:G17	**Unexpectedly / previously / simultaneously**	la nerponasan = unexpectedly; kroti ola = previously; nayo ola = meanwhile/simultaneously; krotiapo = subsequently. No new words.
1.0:G18	**Topic and focus together**	A hozi-topic opens the clause; vinto may then mark a focus inside it. hozi and vinto never mark the same constituent.
1.0:G19	**Version gating**	Texts dated before 1.0 are interpreted with the 0.8 lexicon and rules. A 1.0 reader meeting a retired spelling looks it up in legacy.retired and reads the 1.0 replacement.
1.0:G20	**Lexicalised derivations**	tisebitivu (sword), tibivu (rope), kaldopago (prison) and zeldoyo (rebel) are fixed meanings of regular derivations.

Id	Topic	Ruling
1.0:G21	**Closing a relative clause**	A raho-clause that does not end the sentence is closed by a comma in writing and a pause in speech: Li sabeyo raho vismava eli, ne yehu vimova li vordu. (Found in stress-testing: without the pause the main verb is read inside the relative clause.)
1.0:G22	**Attitude words are clause-final only**	seye, mufe, poye, pifu and zoke never open a clause. 'Perhaps, …' at the start of a sentence is written with the clause-final poye. (Found in stress-testing.)
1.0:G23	**Events taking place**	venreva (come) with an event as subject means 'take place, happen': Li dapadonu po venreva kroti li nilvu, the sale took place before winter.

Rulings carried from 0.8

Id	Topic	Ruling
0.8:R1	**Source of truth and name**	The JSON is authoritative; the workbook is generated. Language field and files are named Liraasa.
0.8:R2	**Predictable unused slots**	An unused form may receive a gloss only when its compositional meaning is predictable, approved case by case, and recorded in authorized_changes.
0.8:R3	**Root Review queue**	Frozen for 0.8. No canonical root is respelled; the 40-root queue carries forward unchanged.
0.8:R4	**Frame tense**	A standalone tense particle opening a paragraph or turn (Po — / Futu —) sets a frame: following unmarked main clauses take that tense until another tense particle, pressa, or the end of the paragraph. Optional. Time words do not set a frame, so 0.7 texts keep their meaning.
0.8:R5	**Article omission**	li may be omitted in everyday speech as well as verse when the referent is obvious; never when ambiguous. baba may be omitted only in verse.
0.8:R6	**sige**	sige clauses never inherit tense; they are always marked. Tense inheritance applies to fime, raho, kube, nayo, kasa, kopisa and tuni.

Id	Topic	Ruling
0.8:R7	**Yesterday evening**	deyaapo is kept as a fossil (it retains the retired past marker apo). apo is not used in new compounds; say vesno de deyaapo.
0.8:R8	**Double -a verbs**	amorliraa, amorrinbaa and amorvulraa are correct; each a is its own syllable.
0.8:R9	**ki with certainty**	A certainty marker (or zoke) precedes ki: Taivo lirala poye ki?
0.8:R10	**Sacred register**	Registers are defined in the grammar guide. The lexicon keeps everyday and poetic labels; sacred is added only to headwords whose root meaning is inherently sacred, after review.
0.8:R11	**Headword target**	New vocabulary is sized by genuine gaps, not by the 120-150 target.
0.8:R12	**-ti on names**	The diminutive -ti may attach to personal names as an affectionate or teasing form (Dorinti).
0.8:G1	**Demonstratives as pronouns**	eli/ola (and eliri/olari) stand alone for things, situations and discourse (ola = what was just said; eli = what follows). For people use eli-nela/ola-nela or saivo, except presentational Eli ka NAME.
0.8:G2	**Negation scope**	ne precedes what it negates: verb or modal (after tense), copula (ne ka), noun phrase or fragment (Ne eli), or a contrasted constituent (ne X, nara Y). Negation is compositional: ne + nuna- is a positive (avoid).
0.8:G3	**Ellipsis**	Everyday speech may omit a repeated subject in coordinated clauses and in answers, omit a repeated predicate after a contrasting subject (Dorin, ne.), answer with tense + verb (Po sapusia.), and echo a word with ki. Speech may break off after any particle; the listener may complete it.
0.8:G4	**Quotation and embedded questions**	ki may close the main clause before an appended direct quotation (Taivo vurlova ki, fime maivo senosia: "...") as well as after it (0.7 order). Embedded wh-questions keep the wh-word in place with no ki; embedded yes/no questions use si (whether).
0.8:G5	**Relative time in subordinate clauses**	Inside an inheriting clause: tefa marks prior action, nayo/roni simultaneous, futu subsequent (future-in-past), sahi habitual.

Id	Topic	Ruling
0.8:G6	**Nominalization**	The root (form 1) is the noun of action or thing (juba, donu, tali). A verb phrase becomes a noun phrase with sidu (Sidu lisrola ka livna de taivo) or a clause with fime (Fime taivo po relnura ka baba juba).
0.8:G7	**Noun-phrase order**	[toda|rada|muya|poka|somi|nuna] [li|eli|ola|OWNER de] [NUMBER] [ADJ...] NOUN[-ti][-ri] [de ...] [raho ...]. toda N = every N; toda li N = all the N; toda OWNER de N = all OWNER's N.
0.8:G8	**Sameness, difference, similarity**	X ka sambasan ko Y (same as); X ka sambanasan da Y (different from); gase NP alone = like NP (simile); gase ADJ gase NP = as ADJ as NP. Lotero silda, ... = on the other hand.

ADR-0011: a noun does not modify a noun

Of two nouns side by side, the first becomes its adjective, and that adjective describes the second: lira + lavra → lirasan lavra, a songbird. The adjective depends on the form of the first noun:

Noun form	Adjective	Example
root	`-san`	sizo → sizosan
ascended	`-asasan`	mavopagoasa → mavopagoasasan
negative	`-nasan`	melona → melonasan

If that adjective slot is unused, it cannot be used. Then take the lexicon's compound of the two nouns if one exists, or else a de phrase. Compounds are untouched by this rule.

Settled questions from 0.8

Question	Answer
Meanings of nevlosolo, kronobelda, marelirbu	REDEFINE with literal 1.0 meanings; 0.5 senses archived as unknown.
Veto any 0.8 addition?	No. All 81 0.8 headwords, the nine new sacred meanings, yugelotero, yebana and mebanena are 1.0 canon.
Root Review queue	Closed: 23 KEEP, 10 retired by compound, 7 respelled (see dispositions.root_review).

Question	Answer
Can -yo/-vu/-pago combine with -asa or -na?	No. A word takes one form OR one derivation, then -ti, then -ri.
Which verbs are transitive?	Usage-based: gome may passivise any verb that is used with an object in the clause; a verb used without an object cannot take gome. No lexical flag is needed.
Are ordinals and fractions canon?	Yes: NUMBER-ne (una-ne, first) before the noun; fractions NUMBER de NUMBER (tressa de cuara). ne after a number is never negation, because ne precedes what it negates.
Should motion prefixes become productive?	No. Closed list va-, du-, taro-, yave-, revo-; lu-, nu-, mi-, so- retired in favour of the roots keleka, nevra, turna, duvla.
Should canon spellings carry a protected flag?	Yes. Every 1.0 headword carries protected: true; tools may never regenerate a canon spelling by rule.

Revised examples

These 3 canon examples broke ADR-0011 and are revised in 1.2. The lexicon keeps the old text.

Before (1.1)	After (1.2)	English
Maivo melo bena opioa lumi	Maivo de benasan melo opioa lumi.	My good music hopes for light
Lotero silda, li cilni ka lasona.	Loterosan silda, li cilni ka lasona.	On the other hand, the city is noise.
Maivo po lemula baba lotero lermi.	Maivo po lemula baba loterosan lermi.	I learned another language.

9

Parsing: how a machine reads a line

The reference implementation is the checker in the Workbench's editor/index.html (parseWord, splitClauses, placeClause, checkLine, backTranslate). This part specifies it.

Data built from the lexicon

- **Form index:** spelling → a **list** of readings. Some spellings belong to more than one namespace (maivo is a pronoun and a root).
- **Closed-class table:** function words, correlatives, time words, particles, pronouns, colours and numerals.
- **Derivations:** root + `-yo` / `-vu` / `-pago`; mavopago means only "society".
- **Legacy table:** pre-1.0 spelling → replacement. migration_forms.kind has five values; for archived phrases the target is a phrase, not a form.
- **English index:** every glossed slot and every synonym.

Tokenising

Tokens are runs of letters, with internal hyphens and apostrophes kept: eli-krono, una-ne and dozira-cuara are one token each. Punctuation splits phrases. A comma is a pause, which matters for frames, for closing a relative clause (`1.0:G21`) and for address (`1.2:G31`).

Reading one word, in order

Lexicon first: many roots end in letters that look like suffixes (navu, sevu, pago), so a known spelling always beats a decomposition.

1. Exact form in the form index → **lexical** (every reading kept).
2. A closed-class word → its class.
3. A numeral, plain or hyphenated, optionally with `-ne` (ordinal).
4. A derivation (`-yo`, `-vu`, `-pago`).
5. Suffix stripping (word longer than 4): strip `-ri`, then `-ti` if what remains is not known. The stem must be a known form, derivation or closed word.
6. A motion prefix (`va-`, `du-`, `taro-`, `yave-`, `revo-`) on a **verb** form.
7. A fraction, N-de-N.
8. A legacy spelling → warn, naming the replacement.
9. A name: capitalised, or in the known-name list.

10. Otherwise: **“not a word of Liraasa”**, an error. Never guess a meaning.

Roles

- From the word itself: tense, operator, copula, valency, determiner, quantifier, degree, focus, preposition, free, placed.
- Lexical readings: verb slot → **verb**; root, ascended and negative → **noun**; the three adjective slots → **adj**.
- Pronouns, names, derivations and fractions → noun. Place, time, manner and cause correlatives → adverb; the others → noun. Time words → adverb or noun.

Splitting clauses

A new clause starts at a linker, or at any `ki-` question word. A coordinated clause has its own single verb; an embedded one runs on into the main predicate, so its verb is not counted as a second verb.

ata nara oro si sina kasa kopisa nevi raho fime kube nayo tuni sige kureli sidu tonsi narli korsi krotiata yava gome ki-oro sabri

Placing tokens in slots

The parser is a state machine, start → subject → verb → post, walking left to right. Focus words stand before their constituent; free and placed words are skipped. Tense and operators move the state to verb. A preposition consumes the noun phrase after it, and la + adjective is an adjunct.

A time word opens or closes the clause freely (`1.2:G24`); after de it is a noun. The verb slot takes a verb form, a copula, a valency operator or gome. A noun phrase before the verb is the subject; after it, the object or complement. Give-type verbs take two bare noun phrases only when the first is a pronoun (`1.2:G26`). Anything left over is an error naming the token and the slot expected.

Reading de

In X de Y, Y is the owner, “X of Y”, **unless** X is a pronoun or a personal name, in which case X is the owner, “X’s Y” (`1.2:G27`). A pronoun is the owner on either side. NUMBER de NUMBER is a fraction. de needs a noun phrase on both sides.

The checker’s rules

Severity	Rule	Id
ERROR	unknown word: “not a word of Liraasa”	never invent

Severity	Rule	Id
WARN	a form whose slot is unused	0.8:R2
WARN	a pre-1.0 spelling, with its replacement	1.0:G19
ERROR	a token that cannot be placed in the slot template	slot
ERROR	a non-verb in the verb slot (with a hint naming its verb form)	slot
ERROR	a second verb in one clause with no linker	slot
ERROR	a second noun phrase but the clause has no verb or copula	slot
WARN	a give-type verb with a bare non-pronoun recipient	1.2:G26
ERROR	two bare nouns side by side → adjective, compound or de phrase	ADR-0011
ERROR	de after a verb or adjective; de with nothing after it	noun phrase
ERROR	a stranded preposition; ala used as the infinitive “to”	noun phrase
ERROR	sidu between non-verbs, or followed by a copula	sidu
ERROR	fime followed by a copula or tense (the demonstrative “that” is ola)	fime
ERROR	zafra / finra / lanto / kenvi not opening its clause	slot 1
WARN	one of those four frame words without its comma	slot 1
NOTE	a time word opening a clause: the comma is optional	1.2:G24
ERROR	a tense or operator out of slot order, or after the verb	1.0:G1
ERROR	excluded pairs in one clause; two evidentials	1.0:G16
ERROR	ki not last; attitude words not clause-final	1.0:G22
ERROR	a question with the copula or tense moved to the front	ki
WARN	a saying-verb + su read as “about”	1.2:G30
WARN	English gloss is passive but the line has no gome	passive
NOTE	-na direction; hema as hesitation	

Back-translation

Back-translation is mechanical and judges nothing. Each word gets its first sense; a pronoun before de becomes a possessive and after de an object; `-ri` adds “s” and `-ti` adds “little”. It is shown beside the writer’s English so drift is visible.

> ⚙ **PARSING NOTE**
>
> Generated text is untrusted. Every machine-written Liraasa line must be tokenised, parsed and checked before it is shown, and a flagged line does not go in the guide.

10

Open questions

These are not decided. They are presented as open, and nothing in this guide resolves them.

- **“Once”, “N times”:** no construction yet.
- **“To + verb”:** a general complement beyond sidu (shared subject) and kopisa (purpose).
- **Evidentials:** the meaning when absent, whose evidence counts inside a fime clause, and the meaning in a question.
- **Relative clauses on a prepositional object:** “the house in which …”.
- **The protected-exceptions label:** it says 36 where 1.0 has 39 compounds; scheduled for repair.
- **Restoring retired roots** needed for *Bumrepago* and possibly others: deferred to the author.

A–E

Appendices

A. Function words

Form	Meaning	Position	Example	Since
li	the	definite article	li nela the person	≤0.8
baba	a / an	indefinite article, any gender/vowel	baba sora a friend	≤0.8
eli	this	near demonstrative	eli lira this song	≤0.8
ola	that	far demonstrative	ola lira that song	≤0.8
eliri	these	plural demonstrative	eliri lirari these songs	≤0.8
olari	those	plural demonstrative	olari lirari those songs	≤0.8
de	of / belonging to	owner + de + possessed noun	taivo de lira your song	≤0.8
sela	oneself / reflexive	pronoun + sela	maivo sela myself	≤0.8
`-na`	lexical negation	suffix within seven-form root system	lumina absence of light	≤0.8
ne	not (sentence/action)	put immediately before scope of negation	maivo ne lirala I do not sing	≤0.8
ke	temporary is / are	copula for state or location now	li nela ke benasan the person is good right now	≤0.8

Form	Meaning	Position	Example	Since
ka	enduring is / are	copula for stable quality	li nela ka benasan the person is good by nature	≤0.8
kapoki	previously was	historical copula; po + ka is also regular	saivo kapoki benasan they were formerly good	≤0.8
po	past marker (preverbal)	Preverbal tense. po ka = was as a trait; kapoki = no longer is.	maivo po lirala I sang	≤0.8
pressa	present (optional)	unmarked present preferred | v0.5: author correction	maivo pressa lirala I sing now	≤0.8
futu	future	tense before verb/predicate	maivo futu lirala I will sing	≤0.8
roni	in progress	progressive aspect, before verb	maivo roni lirala I am singing	≤0.8
tefa	completed	completed aspect, before verb	maivo po tefa lirala I had sung / completed singing	≤0.8
sahi	habitually	habitual aspect, before verb	maivo sahi lirala I sing habitually	≤0.8
kopi	hope to	aspirational modality, not plain future | v0.5: author correction	maivo kopi lirala I hope to sing	≤0.8
povi	can / be able	ability modality before verb	maivo povi lirala I can sing	≤0.8

Form	Meaning	Position	Example	Since
nosi	might (epistemic possibility)	uncertain possibility modality	saivo nosi lirala they might sing	≤0.8
musi	must (obligation / circumstantial necessity)	necessity/obligation modality	maivo musi pagopa I must go	≤0.8
suvi	should	advisability modality	taivo suvi somusia you should rest [see note]	≤0.8
viki	would	hypothetical modality	maivo viki lirala I would sing	≤0.8
ata	and	connect equal constituents | v0.5: author correction	lira ata melo song and music	≤0.8
nara	but / however	contrast two clauses	maivo lirala nara saivo ne lirala I sing but they do not	≤0.8
oro	or	choose among alternatives | v0.5: author correction	miru oro nami water or food	≤0.8
si	if	introduces condition	si taivo lirala, maivo rilura if you sing, I dance [see note]	≤0.8
sina	unless	negative condition	sina taivo pagopa unless you go	≤0.8
kasa	because	introduces cause clause | v0.5: author correction	maivo somusia kasa maivo ke silisan I rest because I'm cold [see note]	≤0.8

Form	Meaning	Position	Example	Since
kopisa	so that / in order to	purpose clause	maivo talita kopisa benaba I work to do good [see note]	≤0.8
nevi	although	concessive subordinate clause	nevi saivo ke silisan although they are cold	≤0.8
raho	who / that / which (relative)	relative clause marker | v0.5: author correction	li nela raho lirala the person who sings	≤0.8
kroti	before	temporal relation | v0.5: author correction	kroti deya before the day	≤0.8
krotiata	then / next	sequence marker; original compound	krotiata maivo lirala then I sing	≤0.8
krotiapo	after	temporal relation; lexicalized existing compound	krotiapo deya after the day	≤0.8
en	in / inside	location | v0.5: author correction	en li nimu in the home	≤0.8
su	on / upon	surface location | v0.5: author correction	su li solo on the stone	≤0.8
ala	to / toward	goal and direction	ala li nimu toward the home	≤0.8
da	from	source | v0.5: author correction	da li nimu from the home	≤0.8
ko	with / alongside	accompaniment | v0.5: author correction	ko saivo with them	≤0.8
vobi	for / on behalf of	benefactive purpose | v0.5: author correction	vobi taivo for you	≤0.8

Form	Meaning	Position	Example	Since
intra	within	internal relation | v0.5: author correction	intra li nimu within the home	≤0.8
entre	between	between two entities | v0.5: author correction	entre luno ata sulba between moon and sun	≤0.8
transa	through / across	passage | v0.5: author correction	transa li sevu across the sea	≤0.8
ultra	beyond	beyond a limit | v0.5: author correction	ultra li navu beyond the sky	≤0.8
hupi	above	vertical relation	hupi li nimu above the home	≤0.8
tula	below	vertical relation	tula li nimu below the home	≤0.8
ligo	near	proximity	ligo li nimu near home	≤0.8
vofa	far from	distance	vofa li nimu far from home	≤0.8
voyu	without	prepositional absence	voyu miru without water	≤0.8
ki	yes/no question	sentence-final particle; no inversion	taivo lirala ki? do you sing?	≤0.8
ki-coda	what	ki- + thing	ki-coda taivo vimova? what do you see? [see note]	≤0.8
ki-pago	where	ki- + place	ki-pago taivo pagopa? where are you going?	≤0.8

Form	Meaning	Position	Example	Since
ki-krono	when	ki- + time	ki-krono maivo lirala? when do I sing?	≤0.8
ki-kasa	why	ki- + cause	ki-kasa taivo somusia? why are you sleeping?	≤0.8
ki-saivo	who	HISTORICAL ONLY; preferred productive interrogative ki-nela.	Ki-saivo lirala? (historical) who is singing?	≤0.8
ki-modo	how	ki- + manner	ki-modo taivo lirala? how do you sing?	≤0.8
ki-nela de	whose	interrogative person (ki-nela) + possession; ki-saivo de is historical	ki-nela de lira? whose song?	≤0.8
ki-muya	how many	question + quantity	ki-muya lirari? how many songs?	≤0.8
la	adverbial particle	la + adjective; adverbs do not need an eighth form	la molusan gently	≤0.8
ruli	very / intensely	degree intensifier	ruli vanisan very beautiful	≤0.8
doli	only	restrictive focus	doli taivo only you	≤0.8
kasi	more	comparative marker before adjective	kasi vanisan more beautiful	≤0.8
menu	less	comparative marker before adjective	menu vanisan less beautiful	≤0.8
tamo	than	comparison reference marker	kasi vanisan tamo saivo more beautiful than them	≤0.8

Form	Meaning	Position	Example	Since
mosa	most	superlative marker	mosa vanisan most beautiful	≤0.8
lusu	least	minimum superlative	lusu vanisan least beautiful	≤0.8
gase	as (comparison)	comparative equality	gase vanisan gase taivo as beautiful as you	≤0.8
toda	all / every	universal quantifier	toda lirari all songs	≤0.8
somi	some	indefinite quantity	somi lirari some songs	≤0.8
nuna	none / no	zero quantity	nuna lirari no songs	≤0.8
muya	many	large quantity	muya lirari many songs	≤0.8
poka	few	small quantity	poka lirari few songs	≤0.8
rada	each	distributive quantity	rada lira each song	≤0.8
`-ti`	little / diminutive	suffix after lexical form, before plural	nelati little person	≤0.8
`-ri`	plurality	suffix after lexical form / -ti	nelari people	≤0.8
zabo	yes / affirmative	affirmative response | v0.5: author correction	zabo yes	≤0.8
kepi	no	negative response	kepi no	≤0.8
fisa	please	request softener	fisa, lirala please sing	≤0.8
yade	sorry / pardon	apology | v0.5: author correction	yade, taivo I'm sorry	≤0.8

Form	Meaning	Position	Example	Since
yeko	hello	greeting	yeko, sora hello, friend	≤0.8
voge	goodbye / parting	farewell | v0.5: author correction	voge, sora goodbye, friend	≤0.8

nullopressa	Tonight
mernofutu	Tomorrow morning
vesnofutu	Tomorrow evening
nullofutu	Tomorrow night

C. Numbers: the construction rules

Group	Value	Liraasa	Rule	Comment
Digit	0	zira	fixed base form	Ten is unzira, not una-zira.

Group	Value	Liraasa	Rule	Comment
Digit	1	una	fixed base form	Ten is unzira, not una-zira.
Digit	2	dossa	fixed base form	Ten is unzira, not una-zira.
Digit	3	tressa	fixed base form	Ten is unzira, not una-zira.
Digit	4	cuara	fixed base form	Ten is unzira, not una-zira.
Digit	5	penta	fixed base form	Ten is unzira, not una-zira.
Digit	6	sesa	fixed base form	Ten is unzira, not una-zira.
Digit	7	seta	fixed base form	Restored in 0.7: no longer a homograph of the reflexive particle; matches setazira / setacenta.
Digit	8	ocha	fixed base form	Ten is unzira, not una-zira.
Digit	9	niva	fixed base form	Restored in 0.7: no longer a homograph of "while"; matches nivazira / nivacenta.
Decade	10	unzira	memorize the contracted form; followed by a hyphen + unit for 21-99	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	20	dozira	memorize the contracted form; followed by a hyphen + unit for 21-99	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	30	trezira	memorize the contracted form; followed by a hyphen + unit for 21-99	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	40	cuazira	memorize the contracted form; followed by a hyphen + unit for 21-99	dozira, trezira, cuazira, penzira are deliberate contractions.

Group	Value	Liraasa	Rule	Comment
Decade	50	penzira	memorize the contracted form; followed by a hyphen + unit for 21-99	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	60	sesazira	digit + zira (formula); 10–50 are memorised contractions	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	70	setazira	digit + zira (formula); 10–50 are memorised contractions	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	80	ochazira	digit + zira (formula); 10–50 are memorised contractions	dozira, trezira, cuazira, penzira are deliberate contractions.
Decade	90	nivazira	digit + zira (formula); 10–50 are memorised contractions	dozira, trezira, cuazira, penzira are deliberate contractions.
Hundreds	100	centa	exactly one hundred is centa (not unacenta)	2xx to 9xx: full digit + centa
Hundreds	200	dossacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	300	tressacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	400	cuaracenta	digit + centa (formula)	Regular for 2..9.
Hundreds	500	pentacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	600	sesacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	700	setacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	800	ochacenta	digit + centa (formula)	Regular for 2..9.
Hundreds	900	nivacenta	digit + centa (formula)	Regular for 2..9.
Scale	1000	mililumi	1 × 1,000 = mililumi	Coined with Spanish-ish mil + lumi ('light'); retained original.

Group	Value	Liraasa	Rule	Comment
Scale	1000000	megalumi	1 × 1,000,000 = megalumi	Retained original; groups can each contain 1 to 999.
Order	A	million GROUP → thousand GROUP → final GROUP	read in descending 10^6, 10^3, 10^0 groups	No word for 'and' inside cardinal numbers.
Hyphen	B	-	hyphen separates spoken components	Keep components joined in writing; normal speech can flow across them.
Omit zero groups	C	ø	do not pronounce absent 000 triplets	0 by itself stays zira.
Teen forms	D	unzira-[digit]	11..19 = 10 + unit	No unique Spanish teen irregularity is needed.
Mixed tens	E	[decade]-[digit]	21..99 = decade + unit, unless unit 0	Preserve fixed decades from uploaded file.
Mixed hundreds	F	[hundred]-[remainder]	101..999 = hundred + 1..99 remainder	Exact 100 omits any remainder.
Thousands	G	[1..999]-mililumi	exactly 1000: mililumi; larger groups prefixed	Prefix form is 3-digit group, not each digit separately.
Millions	H	[1..999]-megalumi	exactly 1,000,000: megalumi; larger groups prefixed	Supports 0..999,999,999 in Number Builder.
Count noun	I	NUMBER + noun(+ri)	English order, no gender agreement	Plural -ri recommended above 1; numeral identifies count.
Non-integers	J	not defined in 0.2	negative, decimal, ordinal, fractions await separate policy	Avoid inventing unwritten rules.

D. Colours

Family	Notes
Red	Red; rubinarvo dark red; rubibio blood red; rubijuba ruby red; rubilumi pink.
Orange	Orange; ojonarvo dark orange; ojobio fresh orange; ojojuba citrine; ojolumi light orange.
Yellow	Yellow; auruminarvo dark yellow; aurumibio 'urine yellow' in source; aurumijuba gold; aurumilumi light yellow.
Blue	Blue; azurinarvo dark blue; azuribio ocean blue; azurijuba sapphire; azurilumi light blue.
Green	Green; verdenarvo dark green; verdebio forest green; verdejuba emerald; verdelumi light green.
Violet	Violet; vionarvo dark purple; viobio fuchsia; viojuba amethyst; violumi light purple.
Black	Black; shadanarvo very dark black; shadabio black of death; shadajuba onyx; shadalumi grey.
White	White; vananarvo grayish-white; vanabio vanilla white; vanajuba silver; vanalumi pale white.
Brown	Brown; ertanarvo dark brown; ertabio earthy biological brown; ertajuba shiny brown; ertalumi light brown.

E. Discourse particles

hema

hesitation; holding the floor ("well…", "um"). **Where:** clause-initial; between constituents; standalone. **Register:** everyday (also poetic for hesitant speech; not sacred).

> Hema… maivo ne sabesia.
> Well... I don't know.

> Taivo futu relnura ki? — Hema. Poye.
> Will you come back? — Well. Maybe.

> Maivo vurlova, hema, baba cupa de miru.
> I'd like, um, a cup of water.

Hema, hema… li bumre ne keleka.

Well, well... the bread isn't rising.

nido

self-repair: cancels the speaker's own preceding word, phrase or clause and replaces it ("I mean", "rather", "no —"). **Where:** immediately after the abandoned item and before its replacement; or clause-initial to reformulate a whole previous utterance. **Register:** everyday; poetic (escalating correctio).

Maivo po bumreba tressa, nido, cuara bumreri.

I baked three, I mean, four loaves.

Taivo ka benasan. Nido, taivo ka ruli benasan.

You're good. I mean, you're very good.

Maivo amora taivo, nido, maivo devoda taivo.

I love you, no, I pledge myself to you.

Maivo po bumreba ne tressa, nara cuara bumreri.

I baked not three but four loaves. (corrective negation, for contrast)

yori

topic return / closure ("anyway", "at any rate"); with a possessive seno phrase, resumption ("as I was saying"). **Where:** clause-initial; standalone. **Register:** everyday.

Yori. Li bumre keleka ki?

Anyway. Is the bread rising?

Yori, maivo de seno: li bumrepago nedunia cono.

As I was saying: the bakery needs coins.

Yori, taivo de seno. Taivo po senosia fime pilo po lenila maivo.

Back to what you were saying. You said father heard me.

Yori.

Whatever. / Anyway.

zoke

irony / sarcasm: the speaker does not endorse, or mocks, the proposition. **Where:** clause-final, in the attitude slot (instead of seye/mufe/poye/pifu); may precede ki; standalone. **Register:** everyday only.

Dorin milobema toda-krono, zoke.

Dorin smiles all the time. (Sure he does.)

Ola ka li bumreasasan, zoke.

That is divinely bready. (Oh, sure.)

Zoke.

Oh, sure. (eye-roll)

Taivo po bumreba eli, zoke ki?

YOU baked this, did you?

Taivo ka ruli pamlonasan, zoke. — Ne zoke. Vera.

You're very impatient, sure. — Not sure. True.
